You can be a Doctor • Games Designer

Archaeologist • Computer Analyst • Midwife

Engineer • Sport Psychologist • Event Organiser

Lawyer • Journalist • Entrepreneur • Musician

Physiotherapist • Teacher...

Undergraduate Prospectus 2021

# An introduction.

Welcome to Canterbury Christ Church University.

We hope that our prospectus will give you a good introduction to the Christ Church way of life. Our campuses in Canterbury and Medway have a warm, friendly atmosphere, with around 15,000 students and 1,600 staff.

We're a modern university, one of a handful in the UK with a campus on a World Heritage Site, giving you the chance to study right in the heart of a cosmopolitan and historic cathedral city.

We offer hundreds of different courses in many subjects, from teacher education, business and nursing to creative industries, medicine, engineering and the sciences. Our research and teaching also say a lot about who we are and how we're making a difference in society.

There's no better way to find out than to come to one of our Open Days and see for yourself. Details are on page 06.

We'd love to welcome you in person, so we hope to see you soon.

**The University's mission is to pursue excellence in higher education: transforming individuals, creating knowledge, enriching communities and building a sustainable future.**

# Welcome.

In a fast-moving, competitive world, your choice of university will make a huge difference to your future.

**Professor Rama Thirunamachandran**  
Vice-Chancellor and Principal

At Christ Church, our courses are designed to give you the higher education you want, and the skills you need to make your own contribution to the world around you.

When you choose your university, you are making one of the biggest decisions of your life – one that will affect you professionally, intellectually and personally, and set you on the road

to a successful future. Everything we do is focused on you and reflects the confidence that you have put in us. Our distinctive academic approach puts you in partnership with research-involved academics – emphasising the development of your professional practice through real-world experience.

You'll be taught on one of two campuses, and each has its own distinct character. So whether you are based in cosmopolitan Canterbury or the historic location of Medway, you will be enjoying high-quality teaching in an inspirational and motivating environment.

You will be part of an extremely diverse community, one which places a high value on individuality and equality. Our students come from over eighty different countries, and include mature and part-time students, as well as those studying for postgraduate qualifications.

But why not see for yourself? We look forward to meeting you at one of our Open Days.

# You can join our community.

The warm and welcoming atmosphere you'll find on campus is one of the things that truly sets us apart.

“Christ Church is a warm and friendly community. Wherever I am on campus, I feel welcome. My tutors have an open door policy, allowing anyone to pop in for a chat whenever they aren't busy studying.”

Callum, Christ Church graduate, now part of the School and College Engagement Team

”

..... We want you to succeed, to be happy, to feel comfortable and to express yourself.

You'll be studying in a nurturing and sympathetic environment where diversity, equality and individuality are part of everything we do. We're proud to have students from across the UK and the world studying at Christ Church, exchanging ideas, values and experiences.

Your fellow students will come from all backgrounds, all ages, all faiths or no faith at all. We have a Canterbury-based Chapel, a Muslim Prayer Room, a Buddhist Meditation Room, and quiet rooms on all campuses, supported and supervised by the University Chaplaincy Team.

Nearly 50% of our full-time undergraduates are mature students, so if you've delayed your studies for a few years, or are coming back to university after a longer break, you'll be in good company.

We look at each application individually, so if you have some experience but don't think you have the necessary qualifications to study for a degree, come and talk to us – we're always happy to answer your questions.

You can take most of our degree courses part-time, giving you the flexibility to combine your current career with academic study.

Contact us to have a chat about how you could be a part of the Christ Church community.

# You'll prepare for a brilliant career.

Studying a subject that interests and inspires you is the main reason for embarking on a university degree. But you also want to know that you'll develop the skills that employers value, to maximise your career prospects after you graduate. At Christ Church, we're focused on your future from day one. We'll work with you and support you to ensure you'll develop the skills, confidence and attributes you need for a bright future and a great career.

If you're an aspiring teacher or health professional, you'll be studying at a University with a national reputation and extensive network of contacts. Our simulation suites provide a realistic work environment allowing you to practise your skills and build your confidence.

Or maybe you're set on the creative industries. Our new Daphne Oram creative arts building is home to the latest digital facilities and our constantly evolving courses are designed to equip our students with the skills they need to feed the booming creative sector in Kent and beyond.

Scientists, engineers, medical and health students will be studying in our new £65m facility, giving the opportunity to work together on real-world projects, with researchers and employers in dedicated makerspaces and labs.

Many of our teaching staff continue to be active in their industries and professions, so they bring real-world expertise into their teaching.

We make time in the academic year for you to take part in personal development activities including placements, employer mentoring, workshops and business networking events.

Research skills are a key part of all our courses, so whatever path you're taking, you'll be encouraged and empowered to be an independent thinker and problem-solver, ready to take your experience into the world of work.

All of this is backed up with support from our Careers and Enterprise Team, who can provide you with information, advice and guidance in planning your future.

“My Christ Church degree has opened up a whole new world and inspired me to examine my true potential as a graduate. I am now looking beyond my current role to what I can achieve personally and professionally.”

Anthony  
Christ Church alumnus, now Detective  
Investigator, Metropolitan Police

”

### We also offer:

- a volunteering service
- work experience funds
- online and drop-in personal advice
- part-time work opportunities.

*At Christ Church, you'll get ready for a brilliant career.*

# We'll be partners...

At Canterbury Christ Church University, we're committed to working with you to ensure you reach your full potential.

As a Christ Church student, you'll take control of your own learning. You'll collaborate with fellow students, staff and other employers, to enhance valuable workplace skills, supported by a wide range of technology and digital media.

We pride ourselves on the high quality of our teaching. We hold a Silver rating in the Teaching Excellence Framework (TEF), exceeding national quality requirements for UK universities. We're above the national average for staff with teaching qualifications.

Together with the investments we're making in our buildings and facilities, we aim to offer you the best possible student experience.

## Inspirational teaching

Tom was voted the Most Innovative Teacher of the Year at the Times Higher Education 2019 awards - 'the Oscars of UK Higher Education'.

Tom's blog 'A poetic nursing heart', and the use of poetry in nurse education, had a transformational effect on colleagues and students both personally and professionally.

Tom Delahunt  
Senior Lecturer in the School of Nursing,  
Midwifery and Social Work

Taking that final leap and making an application can be both exciting and daunting and you'll probably still have lots of questions about your studies and university life.

When you start your student life at Christ Church, our specialist advisers can provide advice and support about anything that's worrying you.

## Starting your university life

Once you've accepted an offer to study with us, you can find all the information you'll need through our student webpages. Additionally, our student-led Facebook groups and peer mentoring scheme are there to help make your transition to university just that little bit easier.

## Support with English language

If English isn't your first language, our Academic English Service is here to help. You can take courses in grammar and vocabulary, as well as in academic writing, reading, and seminar and lecture skills, all taught by specialist lecturers.

## Learning resources

Our library staff will be on hand to assist you throughout your time at university. Specialist support is also provided by our team of dedicated subject librarians and academic and study skills advisers who provide one-to-one tutorials, workshops and tailored resources to help you develop the research skills that you'll need to succeed.

Our on-campus bookshop is one of the largest independent academic bookshops in the UK, stocking a wide range of books supporting your chosen subject area, and has over half a million general and academic titles available to order for the following day. The bookshop also hosts many author readings and events throughout the year.

# ...and we'll support you to succeed.

“Peer mentoring is all about helping others to succeed but it also gives you the opportunity to grow as a person and learn more about yourself.”

Petro  
Marketing with Accounting student

### Peer mentors

You'll be offered a peer mentor – an experienced student – to help you find your way, both before and after you arrive at University. We have pastoral peer mentors who can help with every day or personal challenges, and academic peer mentors who are specifically trained to help you engage with your studies.

### Counselling, mental health and wellbeing

Starting university brings new challenges and you may find that your new lifestyle means you need some extra emotional support. Should you need it, we offer a free, confidential counselling service and a mental wellbeing service. Our specialists include fully qualified professionals including BACP registered counsellors and mental health professionals, with links to external support agencies.

### Overcoming barriers to achievement

If you live with disability, a learning difficulty or long-term health issues, and potentially face barriers to achievement, our Student Disability Service is ready to support you with:

- practical support and accessible teaching rooms
- special arrangements in examinations and assessment
- information about funding opportunities to secure support for your specific needs.

### Care leavers

If you are, or have been, in care, we're committed to helping you realise your ambitions. As one of our students, you will receive support from a designated member of staff who understands your needs.

### Your finances

Living on a student income can be a challenge. If you have any money worries, our Student Support and Wellbeing Advisers are available to help you with:

- ensuring you're getting all the financial support you're eligible for
- financial planning and money management
- your support package from the student loans company
- discretionary support funds you may be able to access
- the availability of additional grants and loans.

“I have dyslexia and have found the support at Christ Church to be really fantastic. I want to teach in the future and the support I've received has given me the confidence to believe in myself.”

Polly  
Special Educational Needs & Inclusion Studies student

# You can broaden your horizons.

Thinking of working abroad in the future? Many courses offer you the opportunity to study overseas as part of a student exchange programme, and we have well-established links and partnerships with many universities around the world. So if you decide to take advantage of these exciting possibilities, we can help to organise every aspect of your trip.

We can also help you find opportunities to work and travel abroad during the holidays or after your graduation.

Megan, Drama student, enjoying the Thanksgiving festivities during her year abroad at High Point University, North Carolina.

## America and Canada

On some courses, you'll be able to study in North America as part of your degree.\* On some other courses you can also apply to study at one of our exchange partners in the USA or Canada for part of your degree.

To find out more, look out for the **NA** icon or visit: [canterbury.ac.uk/studynorthamerica](https://canterbury.ac.uk/studynorthamerica)

## Europe\*\*

The Erasmus+ student mobility programme gives you the opportunity to study or work in Europe as part of your degree. We've been arranging study abroad exchanges for 15 years and have partnerships with leading European universities. If you take part in the programme you will receive a grant to contribute towards accommodation and living expenses abroad in addition to language and cultural support prior to departure.

\* conditions apply

\*\* correct at time of going to print, Feb 2020

## Learn a new language

Whether you're a complete beginner or want to improve your language skills, we offer modules at different levels in French, German, Italian, Spanish and Mandarin, all of which can be taken at the Canterbury Campus alongside your other studies. Learning a new language is a great way to enhance your career prospects and help you when studying or travelling abroad.

# International and connected.

As an international student, you'll join a diverse community drawn from over eighty countries.

Our International Team is here to help you through the application process, and you'll have access to all the advice you'll need to feel happy and settled in your new home.

If English isn't your first language, our Academic English Service offers workshops and tutorials to help you improve your English, and throughout your studies student advisers will be ready to support you.

In your first year you will be given priority if you wish to live in our student accommodation. You'll have plenty of opportunities to experience life in the UK and you'll be able to join a huge range of clubs and societies to make the most of your time with us.

For more information, see page 170 or visit [canterbury.ac.uk/international](https://canterbury.ac.uk/international)

“ Being an international student can be hard and scary, but with the amazing support and the warm welcome at Christ Church, everything was fine. Canterbury has it all: art, history, culture and fun.

Kristiyana  
Performing Arts student

”

# Our unique campuses.

When you join us at Christ Church, you'll study at one of two distinctive and unique campuses in Kent and Medway.

Kent is known as 'The Garden of England', and with good reason. Beautiful countryside, picturesque villages, stunning coastal scenery and cosmopolitan city life. It's also the perfect gateway to the rest of the UK and continental Europe. London is less than an hour from Canterbury by high-speed train and the continent is within easy reach. Major international airports are also close by.

## Canterbury

As a World Heritage Site, Canterbury is one of the country's 'must see' destinations. You'll be studying right at the heart of this great student city, with its historic streets, ancient city walls, cosy pubs, exciting clubs and top-class restaurants. And, of course, you'll be within walking distance of one of the most beautiful cathedrals in the world.

## Medway

The Medway Campus is close to the historic naval town of Chatham and Rochester, with its beautiful cathedral. The campus itself is in an area known as Chatham Maritime, where major developments have created a student-friendly quarter with a real village atmosphere. Here you'll find a multiplex cinema, a shopping centre and a fully equipped sports centre. London is under an hour away by train.

# Canterbury Campus.

North Holmes Road, Canterbury, CT1 1QU

Built in the grounds of the ancient St Augustine's Abbey, and within sight of the magnificent cathedral, our Canterbury Campus is right in the centre of city life.

We're proud to be part of a World Heritage Site and although we're in a busy, cosmopolitan city with a rich programme of festivals and culture, the sea, fields and woodlands are on our doorstep.

We offer great facilities at our Canterbury Campus. Students can step out into a vibrant and world-famous cathedral city and also benefit from a campus with excellent learning and teaching resources, music venues, a superb sports centre, a well-stocked bookshop and plenty of coffee bars and places to eat. Our multi-million pound investment over the last decade on new and renovated buildings is part of our commitment to providing a first-class student experience.

# Canterbury Campus.

North Holmes Road, Canterbury, CT1 1QU

We are transforming our city campus, investing £150m in new and extended spaces for learning, teaching and research.

This exciting development in the city started with the creation of a stunning new creative arts building, followed by a major facility for science, technology, health, engineering and medicine.

This impressive building is home to our new and dynamic range of industry-relevant engineering courses. These courses, and new spaces for research and innovation, focus on creativity in engineering, designing real-world solutions and opening up excellent career opportunities for our students and graduates.

The new Kent and Medway Medical School (KMMS), a collaboration between Canterbury Christ Church and the University of Kent, provides first-class medical education. The new specialist facilities, bringing together engineering, medicine and health, will be an important base for KMMS student doctors studying at both universities.

Open in 2020, a major new facility for science, technology, health, engineering and medicine, transforming our Canterbury Campus.

## Creativity on campus

Our new creative arts building on the Canterbury Campus is dedicated to 21st century creativity and digital innovation on a site with a cultural heritage stretching back to the time of St Augustine. With dedicated facilities for music, performance, games design, media, photography and graphic design, we aim to inspire and support future generations of creative professionals and entrepreneurs.

The Daphne Oram building is designed to reflect contemporary working practices in the digital age, to showcase the work and talents of students and staff, and to facilitate diverse connections for them with partners and businesses. It is a hub for arts and culture in the city and further enhances our contribution to the fast-growing creative industries in the local and national economy.

# Medway Campus.

Rowan Williams Court, Pembroke Court, Chatham Maritime, ME4 4UF

Medway has a long-standing reputation for excellence in Health and Social Care, Education and the Early Years.

The campus is part of Universities at Medway, which is made up of three universities: Canterbury Christ Church University, the University of Kent and the University of Greenwich, so you'll be part of a vibrant student campus with plenty of facilities. A busy programme of social and sporting events is organised by the Students' Unions, while the Drill Hall Library contains extensive collections of books and journals, hundreds of PCs and study places, training rooms and discussion spaces.

As a Health and Social Care student, you'll be learning in our real-world Simulation Suite, designed to teach and enhance clinical skills. The Simulation Suite will enable you to apply the theory you learn to clinical techniques using specialist equipment.

**For more information, visit:**  
[canterbury.ac.uk/medway](http://canterbury.ac.uk/medway)

Fully staged replica NHS operating theatre.

Universities at Medway Campus.

# You can make your home here.

Make friends and live independently in the heart of the city in our student accommodation.

We have a wide range of options for you to consider. All accommodation is self-catering, and there are campus cafés, food courts and local restaurants for those times when you want someone else to do the cooking for you!

With a choice of en suite or shared facilities, your University home will feature 24-hour security, internet access and free contents insurance. All your utility bills are included in the rent, so budgeting will be easy.

We have photos and 360 degree views of some of our rooms, including adapted rooms, on our website.

All of our student accommodation is allocated on a first-come, first-served basis, so if you have a particular preference, apply as soon as you can.

**Full details, including prices, are available at:**  
[canterbury.ac.uk/study-here/accommodation](http://canterbury.ac.uk/study-here/accommodation)

*If you're a first year undergraduate or foundation student and have firmly accepted an offer of a place on one of our courses, your accommodation is guaranteed as long as you apply by 31 July 2021.*

“What’s really fantastic about living in Uni accommodation is that all my friends are just a floor away from me. It’s also great that I am only a 10 minute walk to the University, a 2 minute walk to the library and a 5 minute walk into town. I wouldn’t trade it for the world!”

Jennifer, Health Studies student

”

## Accommodation - continued

### Canterbury

In Canterbury, student residences are study bedrooms grouped into either houses or flats. Many are en suite, and we also have studio and one-bedroom flats designed for shared occupation. Many have communal living and dining areas, and some have beautifully landscaped courtyards.

Security caretakers are on hand at our larger sites 24 hours a day, or just a phone call away at smaller sites.

### Renting privately

You are able to apply to stay in University-managed accommodation for the entire length of your course, but if you decide to move into private accommodation for the second and third year, we recommend that you search via the accredited Homestamp scheme: [homestampkent.co.uk](http://homestampkent.co.uk)

### Medway

If you're studying at our Medway Campus, you'll have the chance to rent a room in one of the purpose-built flats in the private provider Liberty Quays development, which owns and manages the flats. Grouped into modern flats for six or eight students, they feature shared communal lounges and fully equipped kitchens.

### If you have a disability

We have adapted rooms for wheelchair users and students with other disabilities. Please contact our Disability Team early for advice, and to discuss any specific requirements when you apply. Please email:

[disability@canterbury.ac.uk](mailto:disability@canterbury.ac.uk)

*Full details, including prices and 360° tours of our accommodation, are available at:*  
[canterbury.ac.uk/study-here/accommodation](http://canterbury.ac.uk/study-here/accommodation)

Many flats have communal living and dining areas.

# You can get into sport.

Sport and active health are exciting parts of the Christ Church experience. The University's multi-million-pound Sports Centre has the latest fitness equipment and offers affordable gym and recreational sport memberships, a full range of exercise classes, and a personal training service. We also provide a range of free programmes including Couch to 5k, a running club and outdoor boot camp classes in partnership with *Our Parks* to help you stay active and healthy.

With additional facilities in Canterbury, we offer a wide range of club sports; many of our teams regularly compete in the British Universities and Colleges Sports leagues and a variety of other competitions, including the annual Varsity event.

You'll also have access to our joint specialist facility, Polo Farm Sports Club. Just a short distance from the Canterbury Campus, the facilities include three floodlit hockey pitches, an indoor tennis centre, outdoor tennis courts and a spacious new sports hall, specialising in netball, hockey and cricket. The University has five grass sports pitches for football and rugby, and through partnership with local clubs we offer golf, kayaking, equestrian, trampoline and athletics facilities.

## Fitness opportunities

Open seven days a week and featuring the latest equipment, our gym has something for everyone. Whether you're serious about training and competing, or would just like to be more active and get a little fitter, you'll have access to our interactive spin studio, wide-ranging exercise class programme, modern gym, climbing wall and double sports hall.

## Learn to coach

We work with various national governing bodies of sport to offer a range of sport specific coaching and officiating courses, giving you the skills and academic knowledge you need to coach or referee competently. These qualifications are also great for enhancing your career prospects and finding a job doing what you love. In particular, the skills gained from building relationships and tailoring your approach to the needs of a diverse community are useful for anyone seeking out a role in sports development.

# You can be a Sport Scholar.

If you're talented at sport, you can apply for one of our sport scholarships. As a Sport Scholar, you'd enjoy a financial bursary, University gym membership, personal training, mentoring, sports science support and an environment that will help you to achieve both your sporting and academic potential.

Additionally, the University is recognised by Sport England's Talented Athlete Scholarship Scheme as a Dual Career Accredited Site which acknowledges an enhanced level of academic flexibility allowing talented athletes to balance their studies alongside a sporting schedule.

Sport scholarships are available in a range of sports, including disability sport. We have relationships with several high-profile clubs which enable us to offer Elite Scholarships, including Canterbury Rugby Club and Canterbury Cricket Club, where talented athletes may combine playing a high standard of sport with their university studies.

**For more information, visit:**  
[canterbury.ac.uk/sports-scholarship](http://canterbury.ac.uk/sports-scholarship)

“My experience with the Sport Scholarship Programme has been very positive. One of the things that helped me the most was the readily available support from staff at the Sports Lab, with testing which helped me keep track of my progress during the training and competition season.”

Gloria, Double Olympian  
Human Biology student

# You can join the club.

## Student sports clubs

Student sports clubs are run by the Students' Union. Many teams compete regularly in British Universities and Colleges Sport leagues and a variety of other competitions.

### Teams include:

- American football
- Athletics
- Badminton
- Basketball
- Boxing
- Cheerleading
- Climbing
- Cricket
- Equestrian
- Football
- Futsal
- Hockey
- Japanese Jiu Jitsu
- Kayaking
- Lacrosse
- Netball
- Pole fitness
- Rugby
- Snow sports
- Swimming
- Taekwondo
- Tennis
- Trampoline
- Volleyball

**For more information, visit:**  
[ccsu.co.uk](http://ccsu.co.uk)

# You can enjoy arts and culture.

Our vibrant, year-round programme of concerts, exhibitions and events includes something for everyone.

No matter what you study at Christ Church, there are lots of ways to get involved in the cultural life of the University. Students can go to free lunchtime concerts with world-renowned musicians in St Gregory's Centre for Music, or stop by the evening gigs and open mics in St George's Centre. There are exhibitions throughout the year in the Daphne Oram Gallery, and screenings, talks, and events across our campuses.

Canterbury hosts cultural events and exhibitions year-round at the Marlowe Theatre, Canterbury Cathedral, and Canterbury Museums. Medway has vibrant festivals throughout the year and incredible museums including the Chatham Historic Dockyard.

Christ Church also supports cultural events across the region. We are the Partner and Principal Sponsor of Canterbury Festival, and we have sponsored a range of other events including Canterbury Pride, Folkestone Book Festival, and the Turner Prize at Turner Contemporary, Margate.

**For more information, visit:**  
[canterbury.ac.uk/arts-and-culture](http://canterbury.ac.uk/arts-and-culture)

## St George's Student Centre

With its city centre location, the Lounge Bar and Kitchen café, St George's Student Centre is an ideal venue for music, performance and socialising. And it's also home to our Students' Union, so all the entertainment and information you want is right where you need it.

“There are so many opportunities to enjoy creative arts and culture, from major festivals, exhibitions and events, to joining our student-run societies or landing great work experience in the creative industries.

Dr Katie McGown  
Arts and Culture Manager

”

# You can change the world.

We are committed to working with our students to build a more sustainable future.

If, like us, you care about the environment, you'll be able to get involved with 'Us in the World': a collaboration between our students, staff and the Students' Union, working together to embed the UN Sustainable Development Goals (SDG) into everything we do. We were one of the first UK universities to sign the SDG Accord and in the spring of 2019 Christ Church joined other universities, cities and the government in the declaration of a Climate Emergency.

These are just a few of the things we've achieved together so far. We've:

- reduced our electricity and gas consumption by 24% since 2010
- been a 0% waste to landfill university since January 2013, working hard to promote reusable alternatives to single-use plastics
- reduced use of disposable cups by 60% across all sites
- won an International Green Gown Award for our work in 'Institutional Change' on sustainability.

*#livingwell*  
*#actingtogether*  
*#learningforthefuture*

If you're passionate about ensuring a sustainable future, there will be plenty of opportunities to get involved through our Student Green Office.

Find out more at  
[canterbury.ac.uk/sustainability](http://canterbury.ac.uk/sustainability)

*Student Green Office Project Officers:* Chris Henderson, Amy Bayliss-Fox, Fran Allen and Emily Connell.

Staff and students gather in solidarity with global student action on climate change.

# You can get involved.

Going to university is a life-changing experience, and the Students' Union is here to encourage and empower every student to make the most of it.

From the moment you arrive we'll be there helping you move in with our amazing Welcome Crew as well as Freshers' Fayre where you can join a variety of sports clubs and societies. From joining academic societies that support your studies, through to challenging yourself to try something completely new, you'll meet people and make new friends.

Involvement in co-curricula activities can make a huge difference to how you settle into university and ensure you get the most out of your time here.

Our mission is to better student life and enrich student experiences, and our elected officers work with the University to make sure your voice is heard and your feedback acted on. There may be times when you need extra help and support and the Union has a free, independent Advice Centre offering guidance on academic issues, as well as advice on housing, money and any other concerns you may have, to make sure your time at Christ Church is the best it can be.

For more information, visit: [ccsu.co.uk](http://ccsu.co.uk)

## Calendar of events

**AUG** What's Freshers' Week like at your campus? #HelloChristChurch

Freshers' Fayre gives you the chance to sign up for over 100 different sports and societies

**SEPT**

**OCT** Get involved with student democracy and elect your Union Council officers. Do your bit and make a difference to the student experience

It's all about campaigning as we promote This Girl Can, Movember, Union Week... and we may even have a puppy day too!

**NOV**

**DEC** Celebrate the end of semester one with a Christmas social in the Lounge Bar and Kitchen

Another chance to join societies, try a new volunteer project or think about standing for election

**JAN**

**FEB** Student Elections fever takes over campus #CCSUVOICE

Back #TeamChristChurch at the epic annual sports event of Canterbury Varsity

**MAR**

**APR** Awards season means celebrating all the good stuff #CCSU Awards

It's exams time so the Students' Union do what we can to help you #stressless

**MAY**

# You can graduate in a stunning cathedral...

Graduation day is the exciting culmination of your University studies.

If you are awarded a BA or BSc, on your graduation day you'll process into either Canterbury's magnificent cathedral, an amazing setting for your big day, or if you're a student based at Medway Campus, ceremonies take place in the beautiful Rochester Cathedral. You will be heading towards your future with optimism and confidence, secure in the knowledge that as a Christ Church graduate, you'll continue to have access to University support and guidance.

# ...and stay in touch.

When you graduate from Christ Church, your relationship with us doesn't end.

Alumni remain members of our community and you'll automatically become part of a social and professional network of over 50,000 former students.

- Careers support for up to three years after you leave, including regular job notifications or help if you are thinking of starting your own business.
- 20% discount if you decide to continue your studies with us on a Masters or other eligible course.
- Help if you want to organise a reunion with friends as well as notifications of University events for alumni.
- Volunteering opportunities within the University, working with prospective and current students.
- Retail discounts and discounted membership of the University Library and Sports Centre.
- A varied arts and cultural programme and public lectures.

# Courses.

On the following pages, you can explore the undergraduate courses we offer across a range of subject areas.

You will find a brief introduction to each course telling you a little about the subject, and importantly, the range of career options it can open up for you.

We hope this taste of what's on offer will encourage you to visit our website where you will be able to find out so much more about why you should choose to study your course at Canterbury Christ Church University.

[www.canterbury.ac.uk/studyhere](http://www.canterbury.ac.uk/studyhere)

## Single honours

We have over 80 single honours courses leading to qualifications including BA, BSc, BEng and LLB.

## Combined honours

Can't decide between your favourite subjects? Find out more about our combined honours degrees on page 47.

## Foundation years

If you don't get the grades you need or are returning to study, we have a number of four-year degree courses with the first year (Year 0) as a foundation year which introduces you to university study in your chosen subject area.

See page 48 for more information and look out for this icon **FY**.

## Foundation degrees

We offer a number of these qualifications which combine academic study and work-based learning. They usually involve two years full-time study but part-time options may be available. Some subjects offer a one year 'top-up' to honours degree level.

## Professional placements

While you are with us we want to help you develop the skills you need to get a great job when you graduate. So, many of our courses give you the chance to gain work experience or undertake a Professional Placement year.

## A year in North America

Some of our courses provide an exciting opportunity to study for a year in North America at one of our partner institutions.

Look out for this icon **NA**.

## Learning a new language

You can study a range of languages as part of, or alongside, your course. We offer modules on French, German, Italian, Spanish and Mandarin at the Canterbury Campus.

Find out more:  
[www.canterbury.ac.uk/modern-foreign-language-modules](http://www.canterbury.ac.uk/modern-foreign-language-modules)

## Degree Apprenticeships

Canterbury Christ Church University offers a range of Higher and Degree Apprenticeships which combine work with study. These allow employers to attract new recruits with clear progression paths and to upskill existing staff to enable them to be more productive. If you are interested in our apprenticeship offer then please visit:  
[www.canterbury.ac.uk/apprenticeships](http://www.canterbury.ac.uk/apprenticeships)

**MOST OF OUR DEGREE COURSES CAN BE STUDIED FULL-TIME OR PART-TIME OFFERING FLEXIBILITY AND CHOICE.**

“The welcoming atmosphere made me settle in straight away, with supportive supervisors guiding me to succeed in my studies. There are also many opportunities to work and gain experience alongside your studies which help you gain the valuable skills employers are looking for.

Luke  
Psychology (Sport & Exercise)  
graduate, now studying for  
a Masters in Tourism &  
Event Management

“The best thing about studying two subjects is the variety you get within your course and the ability to look at things with two different perspectives.”

Harrison  
Events Management and  
American Studies student

# Combined honours.

Are you finding it hard to decide between two subjects you enjoy? If so, you could tailor your degree with a combined honours degree. Variety, flexibility and a chance to maximise your employability are just some of the advantages on offer when you choose to study a combined degree... and Canterbury Christ Church University offers one of the widest selection of combined degrees in the UK.

## Why study a combined honours degree?

A combined honours degree is one degree covering two subject areas. It will allow you to:

- explore two subjects you enjoy and gain a wider set of knowledge and skills
- tailor your degree to suit your own personal preferences, giving you greater choice of what you study
- meet an even wider range of students to work with and make friends.

## Maximise your employability

With an ever-changing work environment, employers are looking for those who can demonstrate adaptability and diverse knowledge and skills. Specialising in two subject areas provides you with the opportunity to distinguish yourself in an increasingly competitive job market as a graduate who is flexible, adaptable, possesses excellent interpersonal, organisation and problem solving skills, can undertake independent research from more than one discipline and has the ability to work as part of a team.

## What makes a combined honours degree?

Most university degrees are composed of a number of individual modules with each module being worth a set amount of “credits” which indicates the amount of learning undertaken. Our full-time students take 120 credits each year, that’s 360 credits over the length of your degree.

With a combined honours degree, in your first year you will study 60 credits in each of your chosen subject areas. As you progress into your second and third years, you may decide that you prefer one subject to another and you will be able to take more of your credits from your favoured subject.

## Choose your combination

Take a look at the specific subjects you are interested in within this prospectus. The course page will tell you if it is offered as a combined honours and recommend some subjects it combines well with. You’ll find a full list of the combinations in the back index.

For more about the combinations on offer, their UCAS codes, and our suggestions for the combinations we think really work best, please visit our website:  
[canterbury.ac.uk/combined-honours-degrees](http://canterbury.ac.uk/combined-honours-degrees)

# Foundation years.

A number of our degrees are also offered with an additional foundation year (Year 0 of a four year degree). A foundation year can provide an ideal route for those who have the ability to study at degree level but don't have the entry requirements for their chosen subject.

You may be school-leaver who has not quite reached the required tariff points, or you may have decided to follow a different path of study from your A Levels and need to gain a grounding in a new subject area. Perhaps you are someone considering returning to study after a number of years; you don't have the qualifications but have relevant experience and plenty of enthusiasm. If so, a foundation year may be just what you're looking for.

## What is a foundation year course?

**A foundation year is the first year of a four year degree which:**

- provides an introduction not only to study at University but also to your chosen subject
- offers you a highly supportive environment where you can develop the self-confidence, knowledge, skills and understanding for further study.

Our foundation years are offered in the following subject areas:

- Arts & Humanities
- Business
- Chemistry
- Computing
- Education
- Engineering
- Health
- Law
- Psychology, Politics & Sociology
- Science
- Sport & Exercise Sciences

We also offer an International Foundation Year (IFY) / International Foundation Certificate.

You will find more details about what you will study as part of your foundation year on the following pages.

## What next?

Have a look at the course entry for the degree you are interested in studying. If it is also offered as a four year course with a foundation year, you will see this icon **FY**.

Apply through UCAS in the usual way using the UCAS code for the four year option (with Foundation Year). eg BSc Hons Animal Science (with Foundation Year) D301.

“Everyone is so kind and helpful, making the transition to University less stressful. I feel so much more confident and independent.”

Kimberley  
Creative & Professional  
Writing student

**YOUR COURSE**

From day one you will be introduced to university life and begin to develop core academic skills. You will also study a selection of modules closely connected to your future degree pathway.

**These will:**

- introduce you to the arts and humanities, its general themes and research methods and techniques
- help you to develop your self confidence
- encourage you to make the most of campus life and the services offered by the University
- provide close, tailored one-to-one support through timetabled personal tutorials
- offer a varied set of practical and thinking activities where you will learn with your peers in large group and seminar settings.

Supportive and experienced lecturers will help you to access the knowledge and skills you need in a stimulating learning environment.

**The Arts & Humanities Foundation (Year 0) is the first year of study on the following courses:**

BA (Hons) American Studies	FY	UCAS Code T701
BA (Hons) Archaeology	FY	UCAS Code V402
BA (Hons) Commercial Music	FY	UCAS Code W341
BA (Hons) Creative & Professional Writing	FY	UCAS Code W803
BA (Hons) Creative Music Production & Technology	FY	UCAS Code J931
BA (Hons) Digital Media	FY	UCAS Code P315
BA (Hons) English Language	FY	UCAS Code Q313
BA (Hons) English Literature	FY	UCAS Code Q323
BA (Hons) Film Production	FY	UCAS Code P302
BA (Hons) Film, Radio & Television	FY	UCAS Code P307
BA (Hons) Games Design	FY	UCAS Code I601
BA (Hons) Graphic Design	FY	UCAS Code W212
BA (Hons) History	FY	UCAS Code V103
BA (Hons) Media & Communications	FY	UCAS Code P308
BA (Hons) Medieval & Early Modern Studies	FY	UCAS Code V141
BA (Hons) Multimedia Journalism	FY	UCAS Code P500
BA (Hons) Music	FY	UCAS Code W304
BA (Hons) Performing Arts	FY	UCAS Code W491
BA (Hons) Photography	FY	UCAS Code W642
BA (Hons) Religion, Philosophy & Ethics	FY	UCAS Code V602
BA (Hons) Theology	FY	UCAS Code V611

Christ Church Business School and the Department of Law offer successful undergraduate degree courses in Business, Human Resource Management, Accounting, Finance, Marketing and Law. Our foundation year provides an opportunity for those students who, for various reasons, do not meet the current entry requirements to gain the required level of achievement needed for progression to the parent degree. On successful completion of the foundation year, you are able to progress onto your chosen undergraduate course leading to a full honours degree.

Throughout your degree you will be taught in a supportive, friendly and encouraging environment. During this first part of your four year course, our focus is on equipping you for further study in your chosen subject giving you an effective understanding of both business and legal issues. The foundation year also gives you experience of applying what you study to the solution of real-world problems. In this way, you develop the necessary skills for further academic study, inquiry and problem-solving, so that you become an independent learner.

To learn more about your course of study please see the course description for the relevant undergraduate degree course.

**The Business Foundation (Year 0) is the first year of study on the following courses:**

BSc (Hons) Accounting	FY	UCAS Code N408
BSc (Hons) Accounting & Finance	FY	UCAS Code N409
BSc (Hons) Business Management	FY	UCAS Code N205
BSc (Hons) Finance	FY	UCAS Code N305
BSc (Hons) Human Resource Management	FY	UCAS Code N60F
BSc (Hons) International Business Management	FY	UCAS Code N205
BSc (Hons) Marketing	FY	UCAS Code N50F

**CHEMISTRY  
FOUNDATION YEAR**

There is a shortage of high quality applicants for industry jobs in chemistry and in engineering. Designed with input from industry, the Chemistry Foundation will prepare you for higher education in these areas.

You will study the basic theoretical principles of the physical sciences, gaining extensive hands-on practical experience in the laboratory, and will develop the essential mathematical and interpersonal skills necessary for your future in higher education.

The foundation year will build your skills and science-specific knowledge, with key transferable skills integrated throughout the modules and a focus on applications of knowledge. You will be taught in a supportive, friendly and encouraging environment, learning key concepts in chemistry, general science skills and mathematics. You will then undertake more in depth study of chemistry whilst learning key aspects of biology and physics. You will also undertake a small research project as part of your studies.

**The Chemistry Foundation (Year 0) is the first year of study on the following courses:**

BSc (Hons) Biochemistry & Biological Chemistry	FY	UCAS Code C722
BEng (Hons) Chemical Engineering	FY	UCAS Code H101
BSc (Hons) Chemistry for Drug Discovery	FY	UCAS Code F152

## COMPUTING FOUNDATION YEAR

This course offers you an alternative pathway to access degree level study in computing. The course is designed to improve your computing discipline knowledge, including programming. In addition, the course will equip you with the skills you need to study at undergraduate level and will inform your choice of degree.

The foundation year will:

- introduce you to the discipline of computing, including programming concepts
- inform your choice of degree specialism in computing
- provide you with the study skills needed for a degree-level course
- allow you to apply academic knowledge and skills to real world technical challenges.

**The Computing Foundation (Year 0) is the first year of study on the following courses:**

BSc (Hons) Business Information Systems	FY	UCAS Code G406
BSc (Hons) Computer Forensics & Security	FY	UCAS Code G405
BSc (Hons) Computer Science	FY	UCAS Code G408
BSc (Hons) Computing	FY	UCAS Code G401
BEng (Hons) Software Engineering	FY	UCAS Code I301

## ENGINEERING FOUNDATION YEAR

The foundation year prepares you for studying in Higher Education, providing you with the relevant theoretical and practical knowledge to enable you to progress on to the appropriate engineering degree.

You will develop your knowledge and understanding of applying and analysing science to solve societal, industry and organisation's engineering problems to provide inter-disciplinary solutions and approach.

You will explore areas including:

- the fundamental knowledge of scientific, technical and mathematical skills in context of your chosen area of engineering
- problem solving
- applying academic knowledge to real life issues and challenges.

**The Engineering Foundation (Year 0) is the first year of study on the following courses:**

BEng (Hons) Biomedical Engineering	FY	UCAS Code H100
BEng (Hons) Mechanical Engineering	FY	UCAS Code H141
BEng (Hons) Mechanical Engineering (Advanced Manufacture)	FY	UCAS Code H143
BEng (Hons) Mechanical Engineering (Building Services)	FY	UCAS Code H144
BEng (Hons) Mechanical Engineering (Systems)	FY	UCAS Code H142
BEng (Hons) Product Design Engineering	FY	UCAS Code H151

## EDUCATION FOUNDATION YEAR

The foundation year provides a gateway to higher education if you have not gained traditional qualifications or do not meet the entry requirements to enter a three-year degree course.

The aim is to help you develop self-confidence and the skills and understanding needed for undergraduate study. It will introduce you to your chosen subject in a supportive, motivational environment where you will explore a range of topics such as:

- managing your own learning
- academic skills
- communication and working with others
- reflection.

In addition, you'll study topics specifically linked to your chosen degree studies. You'll learn how to work in a team and on your own, and you will gain a basic grounding in such as referencing, report writing and presenting.

**The Education Foundation (Year 0) is the first year of study on the following courses:**

BA (Hons) Arts in Education	FY	UCAS Code L43F
BA (Hons) Counselling, Coaching & Mentoring	FY	UCAS Code B941
BA (Hons) Early Childhood Studies	FY	UCAS Code X391
BA (Hons) Education Studies	FY	UCAS Code X399
BSc (Hons) Human Development, Mind, Body & Spirit	FY	UCAS Code B301
BA (Hons) Physical Education & Sport and Exercise Science	FY	UCAS Code C611
BA (Hons) Primary Education	FY	UCAS Code X320
BA (Hons) Special Educational Needs & Inclusion Studies	FY	UCAS Code X364

## HEALTH FOUNDATION YEAR

The foundation year aims to provide you with a good understanding of how the health and wellbeing of individuals, communities and populations can be improved.

You will study modules that will:

- introduce you to the health and wellbeing sector
- support you to develop your academic skills: literacy, numeracy, IT and research
- encourage you to develop self-confidence and effective communication skills
- help you to manage your own learning and get the most out of university life.

Experienced and friendly lecturers will help you to learn through a blend of interactive activities, lectures, small-group discussions, one-to-one tutorials, online resources, and peer support. You will have the opportunity to reflect on your personal strengths and values in a supportive environment that will assist you in planning your future study and preparing for a health-related career.

**The Health Foundation (Year 0) is the first year of study on the following courses:**

BSc (Hons) Public Health & Health Promotion	FY	See our website
---	----	-----------------

We may be able to offer other four-year programmes (a health course with a foundation year) to candidates who have been successful at a previous interview, but who are unable to subsequently meet the wider entry requirements. See our website for full details of all programmes available.

“ Studying at Christ Church has allowed me to learn about the business environment while practising the creativity of the advertising world. The modules have broadened my understanding of what working in the industry would be like. ”

Grace  
Advertising and  
Marketing student

## LAW FOUNDATION YEAR

Christ Church Business School and the Department of Law offer successful undergraduate degree courses in Business, Human Resource Management, Accounting, Finance, Marketing and Law. Our foundation year provides an opportunity for those students who, for various reasons, do not meet the current entry requirements of the parent degree. On successful completion of the foundation year, you are able to progress onto your chosen undergraduate course leading to a full honours degree.

Throughout your degree you will be taught in a supportive, friendly and encouraging environment. During this first part of your four year course, our focus is on equipping you for further study in your chosen subject giving you an effective understanding of both business and legal issues. The foundation year also gives you experience of applying what you study to the solution of real-world problems. In this way, you develop the necessary skills for further academic study, inquiry and problem-solving, so that you become an independent learner.

To learn more about your course of study please see the course description for the relevant undergraduate degree course.

**The Law Foundation (Year 0) is the first year of study on the following courses:**

LLB Law	FY	UCAS Code MN0F
LLB Law with Finance	FY	UCAS Code MN3F
LLB Law with Business	FY	UCAS Code MN1F

## PSYCHOLOGY, POLITICS & SOCIOLOGY FOUNDATION YEAR

The course offers you an alternative pathway to access degree level study in the School of Psychology, Politics and Sociology. Our exciting range of modules will equip you with the necessary skills and knowledge to study at undergraduate level and will inform your choice of degree. Our supportive teaching team are committed to innovation and excellence in learning and teaching, and will enable you to realise your aspirations and potential and excel in our undergraduate programmes.

The course will:

- introduce you to the key disciplines of psychology, politics and sociology
- inform your choice of degree specialism in one or more of the subjects in the School
- provide you with the study skills and knowledge needed for degree-level learning
- allow you to apply academic knowledge to real-life issues, problems and challenges.

**The Psychology, Politics & Sociology Foundation (Year 0) is the first year of study on the following courses:**

BSc (Hons) Applied Criminology	FY	UCAS Code M905
BSc (Hons) Applied Criminology & Forensic Investigation	FY	See website
BSc (Hons) International Relations	FY	UCAS Code L257
BSc (Hons) Politics	FY	UCAS Code L202
BSc (Hons) Psychology	FY	UCAS Code C803
BSc (Hons) Sociology	FY	UCAS Code L214
BSc (Hons) Sociology & Social Policy	FY	UCAS Code L213

## SCIENCE FOUNDATION YEAR

Science is advancing at an incredible pace and offers many exciting and fulfilling career opportunities.

During this first part of your four year course, you will study the basic theoretical principles of the biological and physical sciences, gaining practical experience in fieldwork and the laboratory, and you'll develop the essential interdisciplinary skills necessary for your future in higher education.

The foundation year will give you the opportunity to develop your skills and science-specific knowledge to provide a firm base on which to build your future studies. You will be taught in a supportive, friendly and encouraging environment, learning key concepts in biology, chemistry and physics before undertaking more in depth study of biology and chemistry and learning basic statistical tests. You will also undertake a small research project as part of your studies.

### The Science Foundation (Year 0) is the first year of study on the following courses:

BSc (Hons) Animal Science	FY	UCAS Code C301
BSc (Hons) Applied Criminology & Forensic Investigation	FY	See website
BSc (Hons) Biochemistry & Biological Chemistry	FY	UCAS Code C722
BSc (Hons) Biology	FY	UCAS Code C101
BSc (Hons) Biomedical Science	FY	UCAS Code B10F
BSc (Hons) Biomolecular Science	FY	UCAS Code C701
BSc (Hons) Chemistry for Drug Discovery	FY	UCAS Code F152
BSc (Hons) Ecology	FY	UCAS Code C181
BSc (Hons) Forensic Investigation	FY	UCAS Code F413
BSc (Hons) Human Biology	FY	UCAS Code B101
BSc (Hons) Plant Science	FY	UCAS Code C201

## SPORT & EXERCISE SCIENCES FOUNDATION YEAR

Our sport and exercise related degree courses offer you the opportunity to explore the science behind physical activity and sports performance. The additional Foundation Year provides a gateway into higher education if you don't have the necessary qualifications to enter a three-year degree course. It also offers you a supportive, motivational environment in which to develop the self-confidence, knowledge and skills for further study.

You will have access to a range of resources and equipment such as our student-focused laboratories, to develop skills and knowledge. Under the guidance of a dynamic team of tutors, you will learn key scientific principles, practical skills, and the application of science to sport and exercise.

These degrees will also allow you to pursue careers in sport, health and fitness publishing, the leisure industry, physical activity and health administration and research, the medical professions and police force, as well as other public sector roles. They also open routes into teaching, through the PGCE.

### The Sport & Exercise Sciences Foundation (Year 0) is the first year of study on the following courses:

BSc (Hons) Sport & Exercise Science	FY	UCAS Code C608
BSc (Hons) Sport Coaching Science	FY	UCAS Code C610
BSc (Hons) Sports Therapy & Rehabilitation	FY	UCAS Code B104

## INTERNATIONAL FOUNDATION YEAR AND INTERNATIONAL FOUNDATION CERTIFICATE

The International Foundation Year (IFY) / International Foundation Certificate will enable you to improve your English language, study skills and academic content knowledge in English to the level necessary to take an undergraduate degree. You will study a combination of language-focused classes alongside subject-based courses relating to a BA/BSc course you intend to study. As well as improving your language skills, you will develop key academic study skills for research, assignment writing and oral presentation. We also provide individual help with your studies through regular tutorials.

Once you have successfully completed the IFY, you are guaranteed a place on the first year of your chosen undergraduate degree course at Christ Church.

For students who are eligible, the International Foundation Year is the first year of a four-year undergraduate degree. For other students, the course is the same, and on successful completion you will be awarded the International Foundation Certificate and can then apply to join our Year 1 BA/BSc degree courses.

### Still have questions?

The Course Enquiry Team at Canterbury Christ Church University is here to help you. We understand that applying to University and finding the right course, one that meets your interests and future aspirations, is a big decision, and we know you are likely to have further questions you'd like to ask us.

We are dedicated to providing you with friendly information, advice and guidance to help you make an informed choice and one that's right for you.

We can offer advice about how to apply for our undergraduate courses, entry requirements, tuition fees and student finance support, in addition to information on what you can expect from life as a Christ Church student.

If you would like to speak to us, you can call us on 01227 928000 and we'll be happy to help with any questions that you may have. We are available 9am - 5.30pm, Monday - Thursday, and 9am - 5pm, Fridays.

Alternatively, you can contact us by email at: [courses@canterbury.ac.uk](mailto:courses@canterbury.ac.uk) via our online web enquiry form: [www.canterbury.ac.uk/study-here/contact-us](http://www.canterbury.ac.uk/study-here/contact-us)

Or through social media:

 [@canterburyccuni](https://twitter.com/canterburyccuni)

 [facebook.com/ChristChurchUni](https://facebook.com/ChristChurchUni)

 [instagram.com/canterburyccuni](https://instagram.com/canterburyccuni)

Our friendly team of enquiry handlers will always try their best to provide you with the support and answers you need and if we can't answer, we will find the people who can!

Megan  
Team Leader,  
Course Enquiry Team

### IMPORTANT INFORMATION

The information was accurate at the time when the prospectus was printed in February 2020. On occasions it may be necessary to change details relating to a particular course that commences from September 2021 onwards. Any changes will be set out on the web page relating to the course. It is recommended that prospective students look at the web page both for further information on the course and for any notifications of change to the details in the prospectus. Where there has been a material change to a course, we will draw this to the attention of applicants at the earliest opportunity.

**Magdalena**  
Games Design student

“The lessons are easy-going but thoroughly engaging and I’m really loving my course. Our tutors are very supportive of us, making our lessons more enjoyable.”

**You can.**

# Art & Design.

- Games Design 60
- Graphic Design 60
- Photography 61
- Product Design 61

**You could also consider:**

- Arts & Humanities
- Foundation Year 53
- Product Design Engineering 76
- Digital Media 106

**GAMES DESIGN**

BA Single Honours

**Your course**

Games Design teaches you the key technical and creative skills needed to produce indie videogames for computer, mobile and console. You will have the opportunity to make tabletop card and board games, and learn about game histories, creative careers and the role of 'play' in contemporary society. You will gain an in-depth knowledge of games-design tools (such as GameMaker Studio), design and development processes, aesthetics, and the relationships between industry, players and designers. You will have access to industry-standard software to produce a range of games, and have the opportunity to build a broad portfolio of games. This new, production-focused degree course will be delivered in the School of Creative Arts and Industries' excellent facilities in the new Daphne Oram building (see page 23), which boast interdisciplinary creative spaces. You will be taught by a team of games industry practitioners and academics, led by Dr Alan Meades, an internationally renowned games scholar.

**You will explore areas including:**

- indie game creation from concept to release
- games design, art, sound and narrative
- games design techniques and software applications
- how to prepare yourself for a successful career in games design.

**Your career**

Career paths include the established videogame and app development sectors, but also marketing and advertising, healthcare and education.

**FY** Also available with a Foundation Year: see p50

**PHOTOGRAPHY**

BA Single Honours

**Your course**

Get your career in the creative industries off to a great start by learning to produce photographs that really stand out in a competitive market. You will be treated as a creative practitioner from day one, working alongside experienced professional photographers who will guide you as you develop your own research interests and pursue your own career aspirations.

The course is delivered in professional-standard darkrooms and studios. You will study a wide range of photographic practices, encouraging you to explore photography as creative expression. You will be taught traditional analogue techniques alongside digital photography, enabling you to make photographic images that demand attention.

The course also embeds excellent project management skills, offering opportunities to produce and organise exhibitions or publications in each year of study. The course offers a range of specialist modules that lets you tailor your degree to the areas of photography you are interested in and even offers you an opportunity to work on a practical project overseas.

**You will explore areas including:**

- traditional analogue and alternative processes
- studio and digital photography
- designing publications and curating exhibitions.

**Your career**

Typical career paths include working as a salaried or freelance photographer within creative industries in areas such as publishing, editorial, fashion, advertising and marketing. Or it can lead to alternative creative careers within a broad range of fields such as education, project management or curatorial practice. Alternatively you may wish to continue your learning through postgraduate study.

**GRAPHIC DESIGN**

BA Single Honours

**Your course**

Graphic Design is deliciously diverse – it is used to inform and to influence, to entertain and to educate. Learn and develop your skills as a designer from the moment you arrive at our purpose-built studios in the new Daphne Oram building (see page 23), and by the time you leave you will have a professional portfolio based on your own interests and be equipped to succeed in a competitive industry.

After a year, you can take on freelance commissions and have the chance to work with local design agencies, alumni, and research-active staff. Our learning community includes previous graduates who love to share their post-university experience with you! You can also study abroad, gaining international experience of design.

You will start by gaining a thorough understanding of design principles, processes and history together with technical skills for print, web, image and motion graphic design creating portfolio pieces as you go. Our specialist staff assist you in developing your own

expertise. You will 'think through making' as you respond to themes such as interpretation, play, materials and processes, and provocation. You put your skills to use in the real world through live briefs and national competition briefs. To capitalise on your design work, you will learn business and entrepreneurial aspects of the industry from professional graphic designers.

**Your career**

Graduates secure roles in art direction, in-house design, illustration, motion graphics, digital design, interactive design, brand management, videography and web design. You might elect to work as a freelancer or choose a salaried career in-house or in a design agency.

**PRODUCT DESIGN**

BA Single Honours

**Your course**

The art of good product design is to create a solution that satisfies the functional brief, appeals to potential consumers, and can be manufactured as cost effectively as possible. One of the challenges facing product designers is to be able to combine creative and technical design skills to create innovative new solutions.

We offer a unique learning opportunity as not only has the course been co-designed with local industry, but during the course you will have the opportunity to solve problems provided by industry. On this course you could be tasked to design bespoke solutions for a company, prototype products for all ages and abilities, or even create an innovative aid for the elderly. You will have the opportunity to work with design engineers, and capitalise using Makerspace to make prototypes of your product ideas. You will conceive ideas to solve the problem(s), design your solution, implement your solution and test/observe your solution using the pioneering CDIO approach (see page 70).

**You will explore areas including:**

- fundamentals of engineering science; materials, internet of things, mechanics
- art and design culture
- digital photography and graphic design
- computer aided design
- design for rapid prototyping to Industry 4.0 manufacture technology
- designing for human users.

**Your career**

As well as subject specific skills, you will develop your design skills, practice, portfolio and employability skills to become an effective, industry-ready product designer.

Product designers are sought after by large corporate companies like IBM, local firms like Megger Instruments and London design companies like Tom Dixon. Product designers have the opportunity to be in-house company designers or self-employed consultants. Both involve working on client design briefs based on market research, and provide you the opportunity to innovate desirable solutions. You will see the process through from hand sketches, computer drawings and making prototypes, to manufacture ready for consumers.

**ACCOUNTING**

BSc Single Honours or in combination with either Business Management or Marketing

**Your course**

Accounting is at the heart of all business decisions and encompasses a vast range of careers, from traditional auditing to global management consulting. To reflect this, our experienced team has created a wide range of modules structured to allow you to gain a thorough understanding of accounting.

Christ Church Business School has strong professional links and provides great opportunities to gain work experience to prepare you for the future. We offer you the opportunity to spend a year on a professional work placement, supported by a dedicated placement officer. In addition, guest speakers are regularly invited to address our students, and our 'Business Futures' weeks promote student interaction with businesses and accounting firms.

**You will explore areas including:**

- economics
- financial accounting
- management accounting.

**Your career**

Many graduates go on to study accounting at professional level. However, these exceptionally versatile degrees open doors to a variety of roles in business. Excellent mentoring by our experienced team will guide and prepare you for your first business or professional accountancy role.

**BUSINESS MANAGEMENT**

BSc Single Honours or in combination with Human Resource Management, Marketing, Accounting, Finance and Advertising, and any other non-Business programme

**Your course**

Good business management is at the centre of every successful organisation and this course is designed to give you the skills you need to be a good business manager. The course has a strong practical element, and from the first day you will be building your knowledge and understanding of organisations and how they are managed.

Designed to prepare you for general management, this course takes both a strategic and operational viewpoint. You will study not only all the fundamental areas of business – finance, HR, marketing and operations – you will also be studying the macro and micro environments in which they operate as well as other areas such as cultural, social and ethical issues.

You will have opportunities to examine real-life organisational problems by making use of the strong links between Christ Church Business School and a wide range of local, regional and national organisations. As with all our business courses, employability and digital skills are embedded to give you hands-on practical experience.

**You will explore areas including:**

- strategic business management
- business operation
- business analysis
- business research.

**Your career**

Combining academic study and practical assessments, this degree will equip you to pursue a wide range of career opportunities. Recent graduates are now employed in roles as diverse as project management, logistics, banking, production management and teaching. Alternatively, your degree will also give you the opportunity to continue your studies at Masters level in a range of business-related disciplines.

**FY** Also available with a Foundation Year: see p51

**ACCOUNTING & FINANCE**

BSc Single Honours

**Your course**

Alongside the specifics of finance and accounting, this course gives you a solid grounding in the challenges of managing organisations, information technology and analytical skills. As well as lectures, seminars, and workshops, you will benefit from Christ Church Business School's extensive links with industry. Guest speakers are regularly invited to address our students, and our 'Business Futures' weeks promote interaction with businesses.

You will have excellent opportunities to undertake work placements, supported by a dedicated placement officer. Christ Church Business School recognises the importance of professional body accreditation and the course is structured to allow you to gain exemptions from major accounting bodies.

**You will explore areas including:**

- economics
- financial accounting
- management accounting.

**Your career**

Many graduates go on to study accounting at professional level. However, this exceptionally versatile degree opens doors to a variety of roles in business. Excellent mentoring by our experienced team will guide and prepare you for your first business or professional accountancy role.

**FINANCE**

BSc Single Honours or in combination with either Business Management or Marketing

**Your course**

With financial issues regularly making headline news, there is no better time to study finance. You will analyse and explore contemporary developments and innovation in corporate finance, international finance, financial decision making, financial analysis and financial markets.

You will gain an excellent preparation for 'city' roles in financial services, banking and accounting as well as in wider business. Additionally, you will have the chance to combine Finance with discipline-specific modules to give you the flexibility to pursue a range of roles requiring an understanding of finance.

**You will explore areas including:**

- business information and analysis
- economics
- financial accounting.

**Your career**

Finance is the gateway to careers and further study at professional or Master level in a range of areas such as banking, financial services, and accounting. With a focus on employability, Christ Church Business School has established links with professional and industrial specialists to enrich the course and provide essential support and advice to our students. Excellent mentoring by our experienced team will guide and prepare you for the challenges and demands of working in the financial services.

## HUMAN RESOURCE MANAGEMENT

BSc Single Honours or in combination with either Business Studies or Marketing

### Your course

People are at the heart of any business and this course covers all the areas of people management in organisations, including employee recruitment, development and reward, as well as communications and performance management.

You will develop a breadth of knowledge in a range of subjects that directly impact all areas of business performance and competitiveness. You will also gain an understanding of leadership and how the behaviours of individuals and teams contribute to the success of organisations.

You have opportunities to examine real-life organisational problems by making use of the strong links between Christ Church Business School and a wide range of local, regional and national organisations. As with all our business courses, employability and digital skills are embedded to give you hands-on practical experience.

### You will explore areas including:

- contemporary business issues
- employee development and employee relations
- management and leadership.

### Your career

The skills and knowledge you gain on your degree will equip you to enter a range of professional and business roles, such as, learning and development, HR business partner, recruitment consultant, and HR outsourcing consultant. Alternatively, you may decide to go on to study professional human resource management qualifications with the Chartered Institute of Personnel and Development (CIPD) or a postgraduate Master's degree.

**FY** Also available with a Foundation Year: see p51

### DURATION

## INTERNATIONAL BUSINESS MANAGEMENT

BSc Single Honours

### Your course

We are living in a global economy where most of the products that surround you will have travelled from across the world, whether as a raw material, a component or a finished good. Increasingly many of the services you use, whether it is booking a flight or watching a film, are often provided by businesses located in countries other than your own. Thanks to the digital revolution, businesses both large and small are able to trade across the world.

However, differences between nations remain, and understanding their similarities and differentiation are essential. This course is designed to equip you with the skills and experience to not only recognise these differences, but develop strategies to make businesses successful in the international environment. As with all of our business courses, it has a strong practical element, and from the first day you will be building your knowledge and understanding of organisations and how they are managed.

You will study all the fundamental areas of business – finance, HR, marketing and operations, together with macro and micro

international environments in which they operate as well as other areas such as cultural, social and ethical issues.

A key part of this course is the inclusion of a language module. As with all our business courses, employability and digital skills are embedded to give you hands-on practical experience.

### You will explore areas including:

- international business strategy
- operational business analysis
- cultural research and analysis.

### Your career

Combining academic study and practical assessments, this degree will equip you to pursue a wide range of international career opportunities. Recent graduates are now employed in roles across the globe from project management, logistics to finance and banking. Alternatively, your degree will also give you the opportunity to continue your studies at Masters level in a range of business-related disciplines.

## LOGISTICS MANAGEMENT

BSc Single Honours or in combination with either Marketing or Business Management

### Your course

Logistics is a vital part of the economy and is becoming increasingly important in the global marketplace. This course gives you the opportunity to balance academic learning with practical insights into this fast-moving and very dynamic industry.

Logistics management is designed to give you an oversight of the management of logistics operations across all areas of the industry. The course takes a twofold approach. On the one hand it covers the practical and more operational elements of logistics, including different transport modes, intermodal operations, and warehousing and inventory operations, while on the other it looks at the broader strategic management aspects of logistics areas such as international logistics, outsourcing operations and benchmarking. You also have the opportunity to explore any aspect of the logistics industry where you have a particular interest.

You can also take advantage of our excellent professional links, giving you the opportunity to meet and hear from those in this industry as

well as visits to logistic operations in Kent. We work with the Chartered Institute of Logistics and Transport giving you opportunities to use their resources and connect with people across the industry.

The modular nature of the course allows you to select modules appropriate to your own career aspirations. As with all our business courses, employability and digital skills are embedded to give you hands-on practical experience.

### You will explore areas including:

- domestic and international logistics management
- business analysis and finance
- marketing
- human resource management.

### Your career

This degree is particularly appropriate if you are looking for a management career in logistics. The course is also well suited to those considering careers in operations roles in other industries and sectors throughout the UK and the world.

**Megan**  
Product Design Engineering student

“ I love my course as I get to experience the general engineering topics before specialising in product design. This has meant I’ve made great friends and we’ve all learnt new skills from each other. ”

**You can.**

# Engineering & Computing.

- Biomedical Engineering 72
- Business Information Systems 72
- Chemical Engineering 73
- Computer Forensics & Security 74
- Computer Science 74
- Computing 75
- Mechanical Engineering 76
- Product Design Engineering 76
- Software Engineering 77

**You could also consider:**

- Chemistry Foundation Year 51
- Computing Foundation Year 52
- Engineering Foundation Year 53
- Product Design 61

# Dynamic courses in engineering.

We are living in an age of rapid technological change where so much of what affects our lives has been engineered:

- from designing the world's most thrilling rollercoaster to developing software to extend smartphone battery life
- from turning recycled plastic bottles into high-end fabrics to creating clothes for Antarctic temperatures
- from providing clean drinking water for the developing world to extending the shelf life of the food in your fridge.

*If you are looking for a career where you can use your creativity to design global, real-world solutions, choose engineering.*

## We are offering a truly immersive learning experience

Our courses and professional placements are designed with specialist engineering and technology businesses to unlock your creative potential and build your technical expertise, so you become a highly-skilled, work-ready engineering graduate.

You will benefit from a new multi-million pound facility for science, technology, health, engineering and medicine, which opens in 2020, and will be able to take advantage of our strong links with industry and employers to put your skills into practice.

## A pioneering approach to your learning

We can help your natural creativity and thirst for problem-solving flourish as you learn. We are one of only a handful of universities in the UK to offer the pioneering CDIO international engineering education model, developed by the world-renowned Massachusetts Institute of Technology (MIT) in collaboration with business.

**Conceive** Look at a problem and think of possible solutions

**Design** Plan how to create your solutions

**Implement** Bring your solutions to life

**Operate** See if your solutions work and are fit for purpose

# Your route into engineering.

From 2020, all engineering students will study in our new multi-million pound flagship facility in Canterbury for science, engineering, technology and health

*Our dynamic courses reflect the breadth of engineering career choices open to you. If you have the desire and interest to make a difference in engineering then we have a course for you.*

## BEng with foundation year

This four-year course starts with the foundation year, which helps you build your engineering skills and knowledge while preparing you for your particular engineering degree.

Our foundation year provides creative and talented students, who may not have the usual entry requirements, with a route to an engineering degree. At the end of the foundation year, you will continue with your selected BEng course.

## MEng/BEng

The three-year BEng will unlock your full potential as a creative problem solver. Our hands-on, practical problem solving approach makes up 40-60% of each year of study so you can be a confident, work-ready engineer by the time you graduate.

The four-year MEng course will advance your engineering talent even further and develop your leadership and management skills.

Remain on, or progress to the MEng, by achieving 50% or more in each module in your first two years of study. MEng/BEng courses also have the opportunity for an additional year on an industry placement.

**On completion of the BEng (Bachelor of Engineering), you will be on track to become an Incorporated Engineer (IEng).**

**On completion of the MEng (Master of Engineering), you will be on track to become a Chartered Engineer (CEng).**

**BIOMEDICAL ENGINEERING**

MEng/BEng Single Honours

**Your course**

Rapid prototype technology, like 3D printers and laser cutting machines, have enabled biomedical engineers and clinicians to work together to lead, innovate, research and develop timely, quality and cost effective mechanical and electromechanical solutions. For example Christ Church medical physicians in the Institute of Medical Science Innovation Hub have used 3D plastic printers to design and print a one-off surgery jig to assist in orthopaedic surgery of bone removal – revolutionary surgery that enabled a child to walk upright for the first time.

On this course you will use the pioneering CDIO approach (see page 70) to give you a rich hands-on experience that you can use to design and develop technology to provide biomedical engineering solutions.

**You will explore areas including:**

- materials engineering
- biomechanics
- chemistry and rapid prototype manufacture
- industry 4.0 technological solutions.

**Your career**

Biomedical engineering is a key area for growth in south-east England which presents exciting opportunities for graduates. You will develop professional engineering practice and employability skills to become an effective, industry-ready engineer.

You will be able to apply and develop technology to provide biomedical engineering solutions for the healthcare industry. Some speciality roles relating to biomedical engineering include: bioinstrumentation; biomaterials; biomechanics; cellular, tissue and genetic engineering; clinical engineering; rehabilitation engineering, and more. You could, for example, work for the NHS to create, implement and maintain bio-instruments and use bio-technology to aid, diagnose and treat diseases, or work in the commercial sector researching and developing engineering materials to develop artificial organs for the human body.

The key is you will be an industry-ready engineering graduate and will be able to creatively approach world challenges.

**FY** Also available with a Foundation Year: see p53

**DURATION**

**CHEMICAL ENGINEERING**

MEng/BEng Single Honours

**Your course**

Chemical engineers convert materials into millions of useful products ranging from pharmaceuticals, clothing, petrol, paints, food, drinks, toiletries, cosmetics and more; while considering holistic ways that are quick, economic, safe and friendly to people and the environment.

You will use the pioneering CDIO approach (see page 70) developed by the Massachusetts Institute of Technology (MIT). CDIO gives you a rich hands-on experience that you can deploy to find urgent solutions to recent and current issues in health, energy, water and food security, resource scarcity, climate change and more.

This innovative course has been designed in collaboration with industry to give you the excellent opportunity to work with a range of employers. Your creative evaluated solutions might be the spark a local employer needs to produce the next critical chemical for our health industry.

**You will explore areas including:**

- automation: process control and instrumentation
- applied chemistry

- process design and engineering
- biotechnology
- environmental and energy engineering.

**Your career**

As well as subject specific skills, you will develop professional engineering practice and employability skills to become an effective, industry-ready engineer. You will be equipped to creatively approach chemical engineering world challenges.

Starting salaries are in the region of £28k per annum (The Telegraph). Chemical engineers enjoy the capacity to thrive in a wide spectrum of jobs including process engineer, consultant, process designer, business developer, manufacturer, process safety professional, CEO, environmental engineer, process control engineer, production engineer, quality control engineer, technical service engineer, research and development director, project engineer, computer applications and technology engineer and more.

**BUSINESS INFORMATION SYSTEMS**

BSc Single Honours

**Your course**

Almost every modern business is reliant on information technology to perform and succeed: from the Amazon-sized businesses to the smallest eBay traders. Information Systems allow businesses to co-operate with their suppliers and customers to provide mutual benefit.

This degree helps you learn how to understand both the business, the people and the technology to improve a business's sustainability. You will learn about all three areas and put theory into practice through a number of projects that cover all the elements of an IT project, from conception, through design, implementation to final operation and review, using elements from the CDIO approach (see page 70). You will learn using IT software that is modern and commercially relevant, such as the Microsoft Office suite, including Project, web-based content management systems, database systems such as Oracle, and prototyping software like Balsamiq.

By the end of the degree you will be able to analyse business problems and know how to help businesses solve their own issues using both top-down and bottom-up techniques. You

will be able to devise and document designs for solutions and have a good appreciation team working. You will be well placed to work and liaise with other computing roles such as software engineers and developers, infrastructure developers, technicians and computer security specialists.

**You will explore areas including:**

- introductory computer programming
- software engineering and business improvement
- e-business and cybersecurity.

**Your career**

BIS is a fast-moving, exciting field of study with great opportunities for employment and further study or research. After graduating you will be in a great position to go on to a wide range of roles, such as business analysis, systems analysis or design, software support and database administration. Alternatively, you may wish to pursue postgraduate study in specialist business or computing programmes.

**COMPUTER FORENSICS & SECURITY**

BSc Single Honours

**Your course**

Computer forensics and security are dynamic and growing areas of computing. As cybercrime continues to rise, so does the need for computing professionals to nurture the skills to defend against and investigate it. You will study specialist computing forensics and security issues alongside broader computing topics, using a variety of different tools and techniques, working with a range of programming languages and operating systems.

Computer security involves supporting organisations by protecting computer systems from malicious attacks, human error, and exploitation of vulnerabilities. This includes utilising an ethical hacking approach to highlight security vulnerabilities so that they can be fixed or mitigated. Computer forensics focuses on recovering intelligence and evidence from digital devices for the purposes of remediation, litigation and prosecution.

**You will explore areas including:**

- computer security
- network forensics
- ethical hacking
- mobile systems forensics.

**Your career**

There's never been a better time for you to enter the computer forensics and cyber security profession. A recent report issued by Parliament on Cyber Security Skills and the UK's Critical National Infrastructure identified a UK crisis resulting from a high demand and low supply of talent. Forbes predict a global shortage of 3.5 million cyber security professionals by 2021, describing the industry as being in crisis. No surprise then that a cyber security role such as a cyber intelligence officer can command a starting salary of £38k ([nationalcareers.service.gov.uk](http://nationalcareers.service.gov.uk)).

As well as a breadth of technical skills, you will develop professional skills to enable you to engage successfully with employers and their business. Areas of work could include digital forensic investigation in law enforcement, the intelligence services (MI5), consultancy, financial services or healthcare.

**COMPUTING**

BSc Single Honours

**Your course**

The goal of our computing degree is to equip you to work in the IT industry in infrastructure and user support. You will learn about understanding the needs of users of IT systems and how to design complete systems that support those needs. In addition, you will learn about the support and training of users of these systems. You will learn to use aspects of a software development cycle to introduce new or replacement computer systems into a setting from a technological and human perspective.

This degree covers networking, system administration, database systems and cybersecurity on the technical side as well as professional skills of business improvement, e-business and usability. This degree will enable you to critically evaluate the success or likely success of a system that has been proposed or developed.

**You will explore areas including:**

- introductory programming
- networking and operating systems
- software engineering, user support and business improvement.

**Your career**

Our computing degree has been designed to meet the real needs of the computing industry, particularly in relation to infrastructure development and support. For the technical skills we use a mix of common hardware, open source and commercial software that is heavily used in industry, so skills developed on the course can immediately be used in the workplace.

You may go on to a wide range of career pathways in designing and supporting IT provision in the workplace. This could be as a generalist across the spectrum of areas or specialising in one such as networks, hardware and software installation of standard or bespoke software, testing or user support. You may be able to extend your knowledge with a Masters or Research degree.

**COMPUTER SCIENCE**

BSc Single Honours

**Your course**

As the use of the internet, 'big data', simulation, and automation continues to grow, so does the need for computing scientists who can provide real solutions to real problems. This course has been designed around the demand for high performance computing in industry.

You will develop a comprehensive theoretical, practical and analytical skill set and learn how to combine theory with practical system design to find solutions to some of the biggest problems faced in the field of computing.

The main emphasis of this degree is on the development of advanced software and the use of cutting edge concepts to enable an intelligent understanding of data on a massive scale using high performance computing.

**You will explore areas including:**

- computational mathematics
- research methods
- artificial intelligence and multi-processing.

**Your career**

You can consider a variety of careers, including working as a software developer or consultant in any industry that requires the use of processing, data, or simulation, such as the intelligence services, financial sector, healthcare, or large internet corporations. You will also be able to use your analytical and process development skills in other new business areas. Alternatively, you could pursue further study on specialist Masters or Research (MPhil/PhD) programmes.

MEng/BEng Single Honours

**Your course**

Mechanical engineers' contribution to our world is all around us. From the chairs we sit on, the clothes we wear, to the services which make our environment safe and healthy.

We offer a unique learning opportunity as our course has been co-designed with local industry, and during the course you will have the opportunity to solve problems provided by local industry. Working with your peers and other fields of engineering, you will apply theoretical learning to solve industry supplied work-related problems. You will conceive ideas to solve the problem(s), design your solution, implement your solution and test/observe your solution using the pioneering CDIO approach (see page 70).

**You will explore areas including:**

- mechanical engineering statics and dynamics
- materials and manufacturer engineering
- engineering design for manufacturer, modular build or systems integration
- electro-mechanical, control, instrumentation and communication systems.

**Your career**

As well as subject specific skills, you will develop professional engineering practice and employability skills to become an effective, industry-ready engineer.

Mechanical engineers are sought after throughout the UK and there are good prospects for a lifelong career. You will be able to apply technology to solve problems and engineering challenges for a variety of industries such as advanced manufacturing, automotive, green energy, construction and biomedical.

**Mechanical Engineering suite:**

Mechanical Engineering UCAS Code: H145 BEng

Mechanical Engineering (Advanced Manufacture) UCAS Codes: H150 MEng or H147 BEng

Mechanical Engineering (Building Services) UCAS Codes: H154 MEng or H148 BEng

Mechanical Engineering (Systems) UCAS Codes: H149 MEng or H146 BEng

**SOFTWARE ENGINEERING**

BEng Single Honours

**Your course**

Software engineering is a fast moving, exciting field of study with the challenge to engineer high quality, secure and reliable software systems. As a consequence, good software engineers are in high demand.

This degree places emphasis on theory, practice and commercial tools that you will need to become a software engineer for computer, web-based and mobile-oriented applications. You will build your technical expertise in programming, network systems and computer hardware architecture through the pioneering CDIO approach (see page 70). This approach will enable you to design, develop and test solutions to industry-related problems.

You will learn and develop subject knowledge, professional engineering practice and employability skills to enable you to become an effective and industry-ready engineer.

**You will explore areas including:**

- human computer interactions
- big data analysis
- agile project development.

**Your career**

You will be able to creatively apply and develop technology to provide digital solutions for any size organisation from mobile app development companies to large IT consultancy organisations like IBM.

Software engineering roles could include researching, designing, developing and testing systems for a range of sectors including aerospace, manufacturing, public services, IT, retail, media, science and research.

The type of work you could be involved in may include: developing a mobile app to assist patients and allied health professionals to manage diabetes; smart bus on-demand route services system for rural communities; virtual GP surgeries or personal entertainment experience systems at airports.

Software developer, programmer, front end developer, product manager, web developer, quality assurance and application developer are just some of the roles that software engineers could thrive in.

**PRODUCT DESIGN ENGINEERING**

MEng/BEng Single Honours

**Your course**

We are constantly seeing new products entering the market and existing ones being updated to have more useful functions. If you are keen to design and improve the usability and sustainability of everyday products such as mobile phones and household appliances to meet the needs of society, or redesign items so they are easier to recycle, choose product design.

As a product design engineer you will learn to solve complex problems, research, develop and prototype your ideas into reality to produce engineered working solutions that can be manufactured. You will also work with designers to make the solution look great!

As well as bringing aesthetics into a solution, product designers can improve the performance and efficiency of existing products. On this course you will use the pioneering CDIO approach (see page 70) to give you a rich hands-on experience that you can deploy to design and create products that provide a product design solution for industry.

**You will explore areas including:**

- computer aided design
- rapid prototyping
- design sustainable products
- modelling analysis and testing.

**Your career**

As well as subject specific skills, you will develop professional engineering practice and employability skills to become an effective, industry-ready engineer.

As a product design engineer you will combine your knowledge of design, engineering and manufacturing processes to create functional products for a wide variety of industries from household equipment to medical products.

- Physiotherapy 85
- Public Health & Health Promotion 86
- Social Work 87
- Speech & Language Therapy 87

**You could also consider:**

Psychology 135

**DIAGNOSTIC RADIOGRAPHY**

BSc Single Honours

**Your course**

Diagnostic radiographers play a crucial role in healthcare by providing a high quality imaging service to diagnose injury or disease. You will gain the knowledge and skills you need to work in hospitals and clinics, in research, or in education. Patient care is at the heart of all we do and the ability to integrate this into how we work and practice is fundamental.

We aim to ensure you become a proactive, competent, confident and responsible practitioner, with a particular emphasis on developing your skills in patient care, image interpretation and preliminary clinical evaluation. An integral part of the course is the development of sound skills in evidence-based practice and research that encourage and enable you to evaluate and improve professional practice for the benefit of service users.

**You will explore areas including:**

- human anatomy, pathology and physiology
- radiographic science and radiation protection
- radiographic practice and image interpretation
- patient care
- evidence-based practice.

Approximately 50% of your time is spent in placements, working and learning in a real clinical environment and building your skills as part of an interdisciplinary team.

**Your career**

You will be entering a changing profession where the scope of practice is rapidly extending and technology is constantly developing. You can choose to enhance your knowledge in a specialist area such as clinical reporting, ultrasound imaging, MRI, CT or nuclear medicine, or to develop your career in leadership and management, research or education.

**DURATION**

**MIDWIFERY**

BSc Single Honours

**Your course**

Being a midwife is a demanding and unique role. Throughout the course, you will develop the practical midwifery skills and knowledge required to care for women experiencing normal pregnancy and those pregnant women who may have a variety of medical and social needs. You will be taught to question and critically evaluate practice and, in doing so, place women and families at the centre of care. As a result, you will be able to respond to pregnant women and their families in a reflective and compassionate manner.

**You will explore areas including:**

- foundations of midwifery practice
- politics and philosophy of midwifery
- clinical skills
- public health challenges in midwifery
- caring for the woman with complex needs
- law and ethics in midwifery practice
- research and evidence based practice.

The course is equally divided between the academic learning environment in the University and the practice setting. During your practice

placements, you will be supported and assessed by midwives, who will guide your learning and development.

The course provides you with the knowledge and skills to be eligible to apply to register with the Nursing and Midwifery Council (NMC), who regulate midwifery practice in the UK, to enable you to practice as a midwife.

**Your career**

On successful completion, there are employment opportunities for you to practice as a midwife both in the UK and abroad. You may also choose to continue on to postgraduate study to support career development in specialist and advanced practice, management, education or research.

**DURATION**

3 years full-time

**HUMAN DEVELOPMENT, MIND, BODY & SPIRIT**

BSc Single Honours

**Your course**

This degree has been designed to provide a multidisciplinary approach with a strong science focus. It draws upon theory and research within different fields, including education, health, welfare, sociology, anthropology, social policy, philosophy, psychology and moral values.

You will consider the whole human lifespan, families and their wider communities, and in particular the interrelatedness of development and learning, and its cultural and biological determinants. You will also discuss, analyse, critique, explore, and evaluate how humans develop in relation to the three key areas of mind, body and spirit.

Our teaching team offers expertise across a range of disciplines, enabling you to gain the latest developments and insights from a wide variety of professions.

**You will explore areas including:**

- psychological development
- physical development and wellbeing
- spiritual development
- moral development
- research and student academic development.

**Your career**

Your degree offers you the possibility to enter a range of professions, including education, health, social care, wellbeing and therapeutic services. You will also be able to progress on to postgraduate study.

**FY** Also available with a Foundation Year: see p52

**NURSING: ADULT NURSING**

BSc Single Honours

**Your course**

Adult Nursing is a dynamic, diverse and evolving profession. As a qualified nurse you will be expected to deliver high quality compassionate evidence based care to your patients and families. Every day will bring new challenges and experiences for adult nurses in a rewarding career. Our course will support you to make a positive contribution to the wellbeing of those in your care.

The programme will give you the knowledge, expertise and skills required to provide holistic care for patients and their families.

**You will explore areas including:**

- nursing knowledge and skills
- health promotion
- evidence based compassionate person-centred care
- clinical science
- collaborative working with a range of health and social care professionals.

50% of your programme will be spent in a variety of placements in both acute and community settings to support your learning

and gain insight into the positive impact nurses make to individuals, families and communities.

Working with your practice assessor, practice supervisor and supported by your personal academic tutor you will gain confidence and competence for your future nursing career. This is further supported by the development of graduate attributes to enable you to lead and deliver care as part of a team. On successful completion of the course, you will be eligible to apply for registration with the Nursing and Midwifery Council (NMC) and gain your first job as a registered nurse.

**Your career**

Adult nurses have a wide range of exciting career opportunities including working in clinical practice, management, education, research or using your skills in the armed forces. You could also choose to travel and explore the possibility of practising overseas.

Additionally, there are opportunities within the Faculty of Health and Wellbeing to progress onto postgraduate study, including continuing professional development courses, MSc or PhD studies.

**NURSING: CHILD NURSING**

BSc Single Honours

**Your course**

Children's nursing is a rewarding career option as you can make a real difference to the care and wellbeing of children and their families.

The course will enable you to develop the knowledge and skills required to become a children's nurse. On successful completion of all components, you will be eligible to apply for registration with the Nursing and Midwifery Council (NMC).

**You will explore areas including:**

- health promotion
- clinical skills
- family-centred care
- evidence-based practice
- interprofessional working.

You will spend 50% of your time at University and 50% of your time on placement across a variety of settings, including hospitals, schools and in the community. You will learn how to care for infants, children, young people and their families in a holistic manner.

We will support your professional and personal development to enable you to develop and improve your leadership skills and assist you to find your first position as a child nurse.

**Your career**

The course offers a good foundation to enter a career in children's nursing in a variety of settings. Our students find jobs locally and nationally either in hospitals, children's wards, neonatal units and community settings.

We encourage our students to develop their careers, and offer continuing professional development courses to support clinical specialist practice (public health, neonatal nursing), management, research and education, through postgraduate and PhD studies.

**OCCUPATIONAL THERAPY**

BSc Single Honours

**Your course**

As an occupational therapist, you will help create solutions to everyday problems experienced by the people who use your services. You will work with people of all ages to manage the impact of disability, enabling them to carry out everyday activities (getting dressed, working, shopping, studying, playing sport).

This course will develop your ability to formulate an understanding of a person's needs. You will learn how to carry out assessments, identify interventions and evaluate your practice.

Completion of the course will enable you to be eligible to apply for registration with the Health and Care Professions Council (HCPC) as an occupational therapist.

**You will explore areas including:**

- body structure and function
- health, wellbeing and occupation
- assessment and intervention
- evidence based practice and research skills
- innovation and entrepreneurship.

You will also spend time on three placements where you will work with occupational therapists in a range of health and social care environments.

**Your career**

As an occupational therapist you will be qualified to work with people of all ages with a wide range of health conditions or social care needs. You can work in the NHS, social care, housing, education, the private or voluntary sector as an independent practitioner or in other emerging areas, for example, with the emergency services and asylum/refugees. You may also choose to develop your career in leadership and management, research or education.

**NURSING: MENTAL HEALTH NURSING**

BSc Single Honours

**Your course**

Mental health nurses play a crucial role in supporting people who are experiencing, or recovering from, a range of mental health problems across a number of different settings. If you want a career where you can make a real difference to the lives of people in mental distress and where each day brings new challenges and experiences, Mental Health Nursing is a good choice.

The course will equip you with the knowledge and skills required to become a mental health nurse and offer eligibility for registration with the Nursing and Midwifery Council (NMC).

**You will explore areas including:**

- mental illness and mental health
- biopsychosocial therapeutic interventions
- psychotherapeutic and systemic approaches
- trauma informed practice
- assessment and planning care
- service users' and carers' perspectives on care

- evidence-based practice
- human biology, pathology, and psychopharmacology
- reflective practice and clinical supervision.
- extensive and advanced physical clinical skills.

As part of your studies, you will undertake practice placements and apply your learning in a variety of settings including hospitals, care homes, and in the community. Each of the modules has a theme such as the recognition, assessment, care planning and interventions for mental illnesses.

**Your career**

Once qualified, there are a wide range of roles that you can specialise in, but you may also choose to develop your career in management, education and research. Our continuing professional development courses enable this through postgraduate and PhD studies.

**OPERATING DEPARTMENT PRACTICE**

BSc Single Honours

**Your course**

Our Operating Department Practice course enables you to become a confident, capable operating department practitioner (ODP) who can carry out complex activities in all areas of the hospital operating department and allied healthcare settings. The course prepares you with the knowledge and understanding to work in a wide range of clinical situations supporting patients as they prepare for, undergo and recover from routine and emergency surgical and anaesthetic procedures. As no two patients or no two operations are the same, variety and the unexpected is at the heart of operating department practice.

**You will explore areas including:**

- human biology and health
- advancing anaesthetic practice
- advancing surgical practice
- advancing post-anaesthetic care
- the role of Surgical First Assistant (SFA)
- leadership and management
- seriously ill and highly dependent patient management.

You'll be guided by staff, within both the University and clinical practice, who have extensive experience in this field of practice and in inter-professional education, which is key to the teamwork needed for patient care.

You will undertake clinical placements within hospital operating departments and other healthcare practice areas. Working under direct supervision alongside qualified practitioners, you will develop your knowledge and skills and build an understanding of the patient's journey and the work of others in their care.

**Your career**

On successful completion of the course, you will be a clinically safe and competent practitioner who will be able to show knowledge and a clinical understanding of the theories and principles of Operating Department Practice.

This innovative degree will be your gateway to developing a career as an ODP. You will also be eligible to apply for registration with the Health and Care Professions Council (HCPC) upon successful completion of the course.

**PHYSIOTHERAPY**

BSc Single Honours

**Your course**

Physiotherapy is a science based profession which aims to empower individuals to maximise their quality of life by restoring, maintaining and improving function and movement. Our course integrates theory and physiotherapy practice to develop you as an effective, safe and autonomous health professional, preparing you for working as a physiotherapist fit for the future.

You will be able to work flexibly in the changing contexts of health and social care, applying leadership and technology skills that you have learnt with us and our practice and community partners.

You will learn from a variety of sources including guidelines, research evidence, clinical reasoning, and the skills, values and professional behaviours that underpin physiotherapy practice.

**You will explore areas including:**

- body structure and function
- health and wellbeing assessment and promotion
- clinical reasoning and decision making
- therapeutic intervention and exercise prescription
- innovation and entrepreneurship.

You will have a number of opportunities to take your learning into practice, initially in our practical and simulation facilities and then on practice placement, where you will work a minimum of 1,000 hours within physiotherapy and health and wellbeing services. Interprofessional experiences will allow you to explore the roles of other health and social care colleagues and recognise the importance of optimising service and agency integration. You will be encouraged to understand the journey of service users, their carers, family and friends.

**Your career**

Once graduated, you will be eligible to apply for registration with the Health and Care Professions Council (HCPC). Physiotherapy career paths include practice in the NHS, private or voluntary sectors, local authorities and working abroad.

You may progress to roles as a physiotherapy educator, advanced clinical practitioner, consultant physiotherapist or a researcher.

**PARAMEDIC SCIENCE**

BSc Single Honours

**Your course**

Being a paramedic is an exciting and challenging role at the frontline of healthcare. You will often be the first on the scene and required to assess, treat and refer patients in an emergency situation.

This course will equip you with the knowledge and skills required to become an autonomous, effective and safe paramedic. Once successfully completed, you will be eligible to apply for registration with the Health and Care Professions Council (HCPC) as a paramedic.

**You will explore areas including:**

- evidence based practice
- decision making skills
- clinical skills
- urgent care
- emergency care
- leadership and management.

Clinical education is central to paramedic science and around 50% of your time will be in both ambulance and non-ambulance practice settings

to help you develop in your chosen profession and apply theory to current practice. Our staff draw upon their own wealth of expertise to help you to achieve your academic potential.

**Your career**

You will gain the skills and knowledge to become a safe and competent paramedic and work alone or as part of a team, applying your professional judgement and being accountable for your decisions.

A wide range of career opportunities are available following registration, including specialist clinical practice in critical care or urgent care, management or in education. As a qualified practitioner, you can develop your career through postgraduate and PhD studies, to support career development in leadership, management, education and research.

**PUBLIC HEALTH & HEALTH PROMOTION**

BSc Single Honours

**Your course**

This course will equip you with the knowledge and skills necessary to work within the public health workforce both in the UK and internationally. The World Health Organization and governments around the world are supporting the expansion of health promotion and public health and want graduates to understand how to prevent ill health and improve people's health and wellbeing.

Working with individuals, communities and populations, this is an expanding and important area to be in.

**You will explore areas including:**

- understanding health, wellbeing and illness
- communicating health information
- promoting and improving health
- health research
- global health
- mental health promotion.

You will study the mental, emotional, social, physical, spiritual, political and environmental influences on health and how currently the government aims to address these.

**Your career**

Public Health and Health Promotion graduates may work in intergovernmental organisations, for national or local government, Public Health England, the National Health Service, the armed forces, independent businesses, charities, non-governmental organisations or the voluntary sector. Examples include: health improvement practitioner, health protection practitioner, public health research assistant, project management, public health nutrition advisor, smoking cessation advisor, substance misuse worker, sexual health advisor, senior health trainer, community development worker and housing officer.

Some of our graduates choose to work towards becoming a teacher or a lecturer. The degrees are suitable for entry to Post Graduate Certificate in Education courses for Primary Teaching, Further Education and Adult Education.

**SOCIAL WORK**

BA Single Honours

**Your course**

Social work is an inspiring, demanding and rewarding profession which requires commitment and resilience.

Our interesting, stimulating and progressive course is designed to encourage your learning and development. The course will help you explore your professional identity while being supported to make the transition from student to a professional social work practitioner. On successful completion of the course you will be eligible to apply to Social Work England to register as a qualified social worker.

You will have the opportunity to practice different social work skills necessary to enable you to be an empathetic and confident social worker in our new simulation suite. You will study the importance of developing a sociological understanding of the complex social issues and structural inequalities that social workers navigate and the social policy that shapes our practice. You will be introduced to theories of social work, human development, research and law and explore their application in practice.

We provide good quality practice placements and have established strong links through

our teaching partnership with statutory and voluntary service providers within Kent and Medway. To ensure that you are informed of up-to-date relevant practice knowledge we engage practitioners and service users in our teaching, learning and assessments.

**You will explore areas including:**

- statutory social work
- international social work
- voluntary and private care sector
- provision within private health care
- court services
- administration/ management
- research and evidence based practice.

**Your career**

There are varied and exciting employment opportunities for registered social workers. This course will equip you with the skills and knowledge which are transferrable across employment sectors.

You can continue your studies in higher education through taking a profession specific Masters, research PhD study or specialised continuing professional development.

**SPEECH & LANGUAGE THERAPY**

BSc Single Honours

**Your course**

This is a collaborative course run jointly by Canterbury Christ Church University and the University of Greenwich. You will study a number of areas which are vital for 21st century speech and language therapy, to understand communication and other disorders, and how to manage these effectively.

You will develop a range of clinical skills and evidence-based knowledge to become an autonomous, competent and accountable practitioner. People with communication difficulties will be at the heart of your learning and you will work closely with and be taught by, for example, those who have been impacted by a stroke or cancer.

You will carry out practice placements in a number of settings, which may include a hospital ward, outpatient department, mainstream and special schools, day centres, clients' homes, courtrooms, prisons and young offenders' institutions.

As this is a collaborative course, you will register with both universities but will have one main university of registration, the final degree will be awarded by your main university.

**You will explore areas including:**

- biopsychosocial and spiritual needs of the client
- linguistics and phonetics
- anatomy and physiology
- speech and language therapy frameworks.

The curriculum is responsive to changing national and local requirements through close liaison both with speech and language therapists in practice, and also with statutory, regulatory and professional bodies to ensure that what is being taught is relevant and current to the changing professional landscape, and to promote academic progression and employability.

**Your career**

Graduates from this course are eligible to register with the Health and Care Professions Council as a speech and language therapist and become members of the Royal College of Speech and Language Therapists.

You can pursue a career as a speech and language therapist, working within the NHS, in education, and in social care settings, such as learning disabilities services. You may also decide to work in the private sector.

## AMERICAN STUDIES

BA Single Honours or in combination with another subject

### Your course

America is distinct among modern countries because of the stories it tells about itself; as the land of the free, and as a site of endless possibilities. A degree in American Studies asks you to uncover the stories that are not being told and to interrogate the world's superpower using a variety of disciplinary approaches. This degree will equip you with the tools you need to make sense of the world and to learn from a decidedly decolonised curriculum that privileges the histories and cultures of marginalised and oppressed peoples.

Our academics are leading researchers in American cinema, history, literature, and politics and we bring our expert knowledge to bear in challenging and rewarding classes.

### You will explore areas including:

- American film, journalism, literature, and music
- histories of race, colonialism and oppression
- 'the frontier' at home and abroad, in politics and foreign relations
- issues of ethnicity, gender, sexuality and class.

### Your career

Recent graduates have gone on to further study, as well as employment in social work, the media, tourism, management, and teaching, but there are few limits to what you can do with an American Studies degree. Employability is a cornerstone of our degree course and our academic team will offer expert guidance and support as you consider your next steps. Our Applied Humanities module provides opportunities for work-based learning relevant to your degree subject.

**FY** Also available with a Foundation Year: see p50

## CREATIVE & PROFESSIONAL WRITING

BA Single Honours or in combination with another subject

### Your course

Whether you dream of being a novelist, want to write drama, or simply wish to gain an excellent skillset for the workplace, Creative and Professional Writing will teach you the essential skills for good writing: control of language, precision, imagination and a deep understanding of the context in which you write.

You will dive into creative forms such as fiction, poetry, drama and game narratives, while learning how to sustain a creative practice within the current publishing industry. You will also explore the rich history of writers who have come before you – from the classics to popular genres such as fantasy and thrillers.

Employability is at the heart of this degree: we believe that every writer needs to be able to support themselves. Supported by tutors with recent industry experience, as well as by published authors and playwrights, you will explore the wide range of job options open to professionally trained writers.

### You will explore areas including:

- writing jobs, such as advertising, publishing and teaching
- writing for different media including spoken word, magazines and blogs
- writing creatively, whether in prose, poetry, graphic novels, games, or advertisements.

### Your career

Your degree will put you in a great position to find employment in teaching, journalism, marketing, public relations, retail management and publishing, but there are few limits to what you can do with a Creative Writing degree. You may also consider postgraduate study. Our modules provide opportunities for work-based learning relevant to your interests.

## ARCHAEOLOGY

BA Single Honours or in combination with another subject

### Your course

Archaeology is the study of over 3 million years of the human past through its physical remains. Our course integrates wide-ranging practical and academic approaches, drawing on skills from the humanities and the sciences. It is a popular choice as a single honours degree or in combination with another subject such as History or Forensic Investigation.

### You will explore areas including:

- field and laboratory techniques
- material culture studies including skeletal remains and artefacts
- archaeology of the prehistoric, classical, and medieval worlds
- computing and data analysis
- contemporary debates and heritage studies.

### Your career

Your degree will equip you with knowledge, skills, and expertise that are highly valued by employers, especially in heritage, education, museums and curation, environmental policy and planning, tourism and media. The transferable skills you will gain in creative and critical thinking, analysis of complex datasets, research, communication, and problem-solving, will open doors to many careers. It will also provide a solid grounding for further study at postgraduate level. Our fieldwork modules provide opportunities to apply and enhance vocational skills and knowledge.

## ENGLISH LANGUAGE

BA Single Honours or in combination with another subject

**Your course**

Language as a means of communication underpins how we function in just about every area of our lives, and the appropriate use of language is the basis for success in virtually every domain of human activity, from politics, to business, even to personal and family life.

On this degree you will develop an in-depth understanding of the English language and its role in the world. In a degree that makes a strong link between language and communication, you will learn the role of language in communication at interpersonal, public, group and intercultural levels. An understanding of the various dimensions of language and communication will give you an ability to communicate more effectively in a complex, globalised world. This course also equips you with the means to develop your own communication abilities that can be transferred to a range of professional settings. It includes modules specifically related to the working world, such as a work placement module and the CELTA module which leads to an internationally recognised professional qualification for teaching English language abroad.

You will also acquire an ability to understand language and communication, as well as the ability to research these areas.

**You will explore areas including:**

- how language works
- how people use, learn and teach English
- how people from different cultures communicate successfully.

**Your career**

The analytical and communication abilities that you will gain are desirable in almost any occupation. They will give you the flexibility to choose from many employment sectors. Teaching and social work are common career destinations.

Graduates also often choose to work in a creative field, like journalism, advertising, public relations or marketing, while there are further work opportunities in other fields, such as communication training or human resources.

## ENGLISH LITERATURE

BA Single Honours or in combination with another subject

**Your course**

If you have a passion for reading books, and thinking about the ideas and debates they reflect and inspire, then you will enjoy studying English Literature with us. You will explore the way that literature helps us to imagine what it is like to walk in other people's shoes, and how it can take us on journeys of self-discovery. Through lectures, seminars, workshops and tutorials, you will learn to read, analyse, and write about works of literature in their cultural and historical contexts. You will engage in topical discussions about how books empower people to tell their own stories, and how they help us redefine notions of gender, sexuality, ethnicity, class and other markers of identity. Our modules encompass a wide range of authors and genres, from well-known figures to marginalised voices and texts, ripe for re-discovery. Booklovers will feel right at home here with us.

**You will explore areas including:**

- modern and contemporary literature
- the Brontës, Dickens and other Victorian writers
- the works and literary afterlives of Austen, Shelley and other Romantic authors
- Chaucer and the literature of the Middle Ages

- Shakespeare, Marlowe and their contemporaries on the page and in performance
- women's writing
- black and minority ethnic literature
- literature and place/the environment
- American literature
- banned books
- literary adaptation
- popular fiction
- literature and wellbeing.

**Your career**

Your English Literature degree opens doors to a variety of careers – all graduate jobs demand skills in reading, gathering information, and communicating with clarity and precision. Popular career choices for graduates include teaching, journalism, public relations, marketing and advertising, and social work. Alternatively, you may wish to continue your learning through postgraduate study. Our Applied Humanities module provides opportunities for work-based learning relevant to your degree subject.

## HISTORY

BA Single Honours or in combination with another subject

**Your course**

In your first year, you will study a variety of important historical issues embedded within a number of broad chronological time-spans – from ancient history through the medieval and early modern periods to the modern/contemporary era. Along the way, you will encounter differing approaches to history: political, cultural, military, social, economic and gender, amongst others. This first-year experience will help you to make well-informed decisions about the kinds of history you would like to study, in your second and third years you can focus largely on one particular period of history or mix-and-match several periods.

You will be taught at our vibrant campus in the heart of the historic and beautiful city of Canterbury, a UNESCO World Heritage Site only an hour from London by high-speed train. Our History team are all professional historians, active researchers and published authors of national and international acclaim who seek wherever possible to share their expertise with their students through research-informed teaching.

**You will explore areas including:**

- the Cold War, the troubles in Northern Ireland, the 'Global Sixties', and American popular culture through Superhero comics
- the Renaissance and Reformation, Tudor and Stuart politics, witchcraft and magic, and the history of poverty
- the Crusades, Medieval women, the Normans, and Medieval kingship, queenship and statecraft
- Egypt, Greece, Ancient Rome and the birth of human civilizations.

**Your career**

Recent history graduates have gone on to further study in Higher Education, and to careers in heritage, education, the public sector, in arts industries and in business. We work hard to prepare you for the world of work by emphasising the transferable skills valued by employers across a spectrum of professions, including empirical research, critical thinking, and clear writing.

**MEDIEVAL & EARLY MODERN STUDIES**

BA Single Honours

**Your course**

Medieval and Early Modern Studies offers you the opportunity to study world history and culture from the end of the Roman Empire (c.300) to the French Revolution (c.1790).

The course draws upon methodologies from history, English literature, archaeology and theology. You can choose from a wide range of optional modules across these disciplines, anchored by core modules that consider the medieval and early modern world in all its complexity and richness. Although our approach is global and comparative, the course is also rooted firmly in Canterbury and the local area, drawing inspiration and case studies from the Cathedral, Dover Castle and other local sites of interest.

**You will explore areas including:**

- Viking and Norman history and culture
- medieval archaeology
- queenship and gender studies
- medieval and early modern military history
- early Christian theology.

**Your career**

You will be equipped to pursue further study or employment in a range of careers including management and teaching, but there are few limits to what you can do with a Medieval and Early Modern Studies degree. Our Applied Humanities module provides opportunities for work-based learning relevant to your degree subject.

**THEOLOGY**

BA Single Honours or in combination with another subject

**Your course**

Theology provides an intellectual space for anyone drawn to thinking about God and Christian faith. You will explore how people of faith have instilled life with religious meaning, seek to understand how Christian beliefs and values are relevant to the world, and investigate what Christianity in action looks like today. You will also have the opportunity to study important religious traditions other than Christianity. Our degree offers you a challenging and stimulating course that encourages open-mindedness and lively debate. You will be taught by an experienced team of academics who have published widely on topics such as Biblical studies, theology and the arts, philosophical and practical theology, and Christian doctrine.

**You will explore areas including:**

- beliefs in Jesus Christ
- key Christian doctrines
- New Testament studies
- Christianity and other religions
- Christianity in today's world.

**Your career**

You will be well placed to work in Christian ministry, youth work, primary and secondary school teaching, and other professional caring work. Past graduates have gone on to professional roles with charities, opted for further study at postgraduate level, and secured work lecturing in North American universities. Our Applied Humanities module provides opportunities for work-based learning relevant to your degree subject.

**RELIGION, PHILOSOPHY & ETHICS**

BA Single Honours or in combination with another subject

**Your course**

Religion, philosophy and ethics are key to understanding our increasingly diverse, internationalised and multicultural world. Religious, philosophical and ethical concerns feature regularly in the media, and underpin a range of often contested issues in the world we share. Our degree offers you a challenging and stimulating course that encourages critical thinking and lively debate.

You will be taught by an experienced team of academics who have published widely on topics such as Buddhist philosophy, conflicts over Jewish identity and interfaith dialogue, and the history of philosophy and ethics.

**You will explore areas including:**

- ethical theories and issues
- world religions
- Western and Eastern philosophies
- religion and science.

**Your career**

You will be equipped with knowledge and skills vital for life and work in our multicultural society. Past graduates have gone on to further study and to employment in professional careers including in human resources, advising local government, primary and secondary teaching, charities, and other careers such as events management or accountancy. Our Applied Humanities module provides opportunities for work-based learning relevant to your degree subject.

**APPLIED CRIMINOLOGY**

BA/BSc Single Honours or in combination with another subject

**Your course**

Crime is an intrinsic theme in today's society and stories of crime therefore dominate the news and entertainment media. Criminology uses psychological, sociological and legal theory to examine the nature, scope and causes of a range of crimes, while also exploring the methods used to manage criminals and criminal behaviour.

This course allows you to study crime, criminology, victimology and criminal justice and enables you to understand these aspects of the criminal justice system through the application of a range of criminological and related theories.

You'll be prepared for a range of careers in crime, criminology, criminal justice and related fields. Our staff are all practitioners or researchers and have a wealth of knowledge and experience to share, incorporating real life crime problems and scenarios they have encountered to ensure you receive a 'hands-on' and realistic experience.

**You will explore areas including:**

- key criminological theories and theorists
- drug crime, violent crime, terrorism, gang crime
- criminals and criminality
- victims and victimology
- management and treatment of criminals and victims.

**Your career**

This course allows you to gain extensive and diverse knowledge and skills to prepare you for employment in a range of occupations in crime and criminal justice, such as with the Police Service, Prison Service or Probation Service, while also preparing you to work with a range of offenders, and within a range of disciplines (i.e. drug crime, gang crime etc.).

**APPLIED CRIMINOLOGY with another subject**

Applied Criminology with another named criminal justice subject (Single Honours)

**Your course**

Crime is an intrinsic theme in today's society and stories of crime dominate the news and entertainment media. Criminology uses psychological, sociological and legal theory to examine the nature, scope and causes of a range of crimes, while also exploring the methods used to manage criminals and criminal behaviour. This degree allows you to gain a solid grounding in Applied Criminology, while also exploring another specific aspect of criminal activity and justice.

You will study crime, criminology, victimology and criminal justice through the understanding and application of a range of criminological and related theories. Studying another related subject in depth, choosing from Criminal Investigation, Interpersonal Violence, Policing and Terrorism and Political Violence, will prepare you for a range of careers in crime, criminology, criminal justice and related fields, and beyond.

Our staff are all practitioners or researchers and have a wealth of knowledge and experience to share with you to ensure that you have a 'hands-on' and realistic experience by incorporating real life crime problems and scenarios they have encountered.

**OTHER SUBJECTS YOU CAN STUDY AS PART OF AN "APPLIED CRIMINOLOGY WITH" DEGREE INCLUDE:**

Applied Criminology (Criminal Investigation)  
UCAS code M901

Applied Criminology (Interpersonal Violence)  
UCAS code M902

Applied Criminology (Policing) UCAS code M903  
Applied Criminology (Terrorism & Political Violence)  
UCAS code M904

**Your career**

Our courses allow you to gain extensive and diverse knowledge and skills that prepare you for employment in a range of occupations in crime and criminal justice. Studying applied criminology with another subject provides you with an opportunity to gain expertise in another area, thereby further widening your employment potential. You have the opportunity to develop a range of transferable skills, which ensures that you have access to a range of graduate level career opportunities and postgraduate study opportunities.

**APPLIED CRIMINOLOGY & FORENSIC INVESTIGATION**

BSc Single Honours

**Your course**

This programme combines criminology and forensic investigation modules, allowing you to explore how psychological, sociological and legal theories can be used to understand crime, criminals, victims of crime, and criminal justice. Students will gain an understanding of the factors that lead to crime and how to prevent crime, understand crime and manage both criminals and victims of crime.

You will have the opportunity to gain a thorough understanding of forensic theories and the practical application of real life and mock forensic cases and scenarios. This will enable you to understand how to investigate and resolve crime that has already happened.

Through our strong links with a number of criminal justice agencies, you will be encouraged to utilise the volunteering and networking opportunities made available to you.

This unique combination prepares you for a range of exciting and remarkable careers in criminology, criminal justice, forensic investigation and related fields.

**You will explore areas including:**

- criminology, victimology and criminal justice
- drug crime, sexual violence, youth crime, terrorism
- crime scene investigation and presentation of evidence in court.

**Your career**

As forensic employers value practical experience, this programme includes a high level of practical and laboratory work and practical assessments to prepare you for a range of opportunities, particularly crime scene careers, forensic science careers and related careers, such as policing.

The skills and knowledge gained through the criminology modules will provide you with an excellent springboard to employment in a range of criminal justice settings, such as the Police Service, Prison Service, Probation Service and youth offending work.

**COUNTER TERRORISM & TRANSNATIONAL CRIME**

BSc Single Honours

**Your course**

Terrorism, counter-terrorism and transnational crime are issues currently faced by many countries across the world. This degree presents a unique opportunity to provide you with both context and a critical outlook on these highly publicised cases, and introduces you to the aspects the media does not talk about.

After the tragic events of 9/11 in the USA, the world entered what many see to be a new era in how we understand, perceive and react to transnational crime, including terrorism. Despite the significance of the attack on the World Trade Centre, transnational crime and terrorism are not new concepts. To understand the current strategies in tackling these phenomena, it is important to learn from history, evaluate the complexities, and take a holistic but critical view of politics, policies, international treaties, and policing powers.

Through varied modules this degree will equip you with the practical and theoretical knowledge you need to help address what works in tackling transnational crime.

**You will explore areas including:**

- responses to terrorism and political violence
- forensic investigation, crime science, criminal investigation
- international policing, decision making.

**Your career**

Many of our students choose to continue their education by undertaking research degrees with us. Alternatively, you could choose to apply for jobs within the criminal justice field, in the civil service, local government, Her Majesty's Prison and Probation Service, to name but a few.

Should you decide you wish to join the police following your studies, this degree represents the third route into policing as a degree level award holder. If successful in joining the police, you would be required to undertake a diploma in policing within the first two years of your police service.

**FORENSIC INVESTIGATION**

BA/BSc Single Honours or in combination with Archaeology, Biology or Psychology

**Your course**

Forensic investigators are key players in investigating and resolving crime and careers in this area are therefore exciting, challenging and rewarding.

Students will learn the theory associated with crime scene investigation, forensic science and presenting evidence as an expert or professional witness in court. You will also have the opportunity to become competent in the practical application of theory in a range of crime scenarios, to ensure you are prepared for core forensic careers.

You will explore the multidisciplinary nature of forensic investigation and related careers through a range of core forensic investigation modules and diverse optional modules focusing on related specialties (e.g. policing, cybercrime and criminal psychology), ensuring that a wide range of career progression opportunities are available to you.

**You will explore areas including:**

- volume, series, serious and major crime scene investigation

- fire, explosion, terror and disaster scene investigation
- forensic biology, forensic chemistry & marks, impressions & pattern evidence
- court awareness and expert and professional witnesses.

**Your career**

Forensic employers value practical experience of forensic investigation and therefore, this programme includes a high level of practical, laboratory work and practical assessments to prepare you for a range of opportunities, particularly crime scene careers, forensic science careers and related careers, such as policing. You have the opportunity to develop a range of transferable skills, which ensures that you have access to a range of graduate level career opportunities and postgraduate study opportunities. All aspects of the programme are designed to prepare you for forensic careers and to ensure you meet the needs of forensic and related employers.

**CRIMINAL INVESTIGATION**

BSc Single Honours

**Your course**

This course allows you to study the historical rise of the detective, from the early days of the new police into the modern era. The increase in crime, and the manner in which crime is committed today, provides very different challenges to the detectives of the past.

Students will have the opportunity to critically analyse how the police service has met some of these challenges by exploring high profile cases that demonstrate how criminal investigations can fail due to systematic or individual error, and equally, good examples of police practice which demonstrate the highest standards of professionalism.

You will also seek to understand the current context within which detectives work, including a national shortage of detectives, government austerity measures and the rise in technology and complex criminality.

**You will explore areas including:**

- the history of detectives
- detective professionalisation
- management of crimes depending upon their seriousness
- recurring problems in criminal investigation
- the ethical and legal nature of detective work.

**Your career**

The choice of careers following graduation is wide and varied. Graduates may decide to join the police as a degree level award holder, or become an investigator for the National Crime Agency, Military, Independent Office for Police Conduct, Criminal Cases Review Commission, Security Services, HM Courts and Tribunals Service, and so on. Some students opt to undertake further research, and go on to study Masters by research on criminal investigation topics of their choice. If successful in joining the police, you would be required to undertake a diploma in policing within the first two years of your police service.

**LAW**

LLB Single Honours

**Your course**

This original and innovative course has been designed in consultation with solicitors and senior managers from a range of local organisations to give you both a theoretical and practical experience in law. You will join a challenging, vibrant and friendly environment and your degree will be recognised as a qualifying law degree, enabling you to progress to the vocational stage of lawyer's training to qualify as either a solicitor or barrister.

We have strong links with our local community through our engagement with Citizens Advice, as well as with the local courts in Kent through our Access to Justice Scheme, giving you the chance to act as a community legal companion for unrepresented parties at court. This is an excellent opportunity for you to gain hands-on work experience in a legal setting.

**You will explore areas including:**

- traditional legal areas such as criminal law, obligations, English legal system and constitutional, commercial and corporate law, as well as intellectual property and internet law
- alternative dispute resolution human rights and medical law
- you can also choose to complete an individual study (dissertation) module on a legal topic based on an area of your own interest.

**Your career**

Our innovative course and professional links will put you in a great position to begin a legal career. But, you will also develop transferable skills which will open up a range of other possible careers in: education, public service, management, paralegal, chartered secretary or in financial services. Alternatively, you could pursue postgraduate study in law or a related area, such as management, marketing or accountancy.

**PROFESSIONAL POLICING**

BSc Single Honours

**Your course**

Canterbury Christ Church University has twenty five years of experience in police education and the course builds on this, embedding the National Policing Curriculum.

Validated by the College of Policing, this course provides you with a strong grounding in the theory and practice of policing, and meets the pre-join requirement for the role of police constable.

You will gain a broad understanding of crime and the criminal justice system, as well as the diversity of the police role and will gain practical experience through volunteering opportunities within the criminal justice system, giving you a great start to your career.

**You will explore areas including:**

- key policing legislation and procedures
- criminal justice system
- crime prevention and criminology
- criminal investigations
- policing communities
- evidence-based policing and research methods.

**Your career**

New, exciting careers are emerging in the policing, criminal justice and security fields. In addition to the police constable role, you could pursue a specialist police staff role or join national police organisations e.g. National Crime Agency. You could also take on roles in other justice related public sector employment, e.g. Border Force, UK Visas and Immigration, prisons, the civil service, offender rehabilitation and the armed forces.

**LAW with another subject**

LLB with another named subject (Single Honours)

**Your course**

An alternative approach to gaining a qualifying Law degree is to study on one of our 'LLB with' degrees. These share the same core Law components as the LLB Single Honours but also allow you to study another subject alongside Law to gain different insights and experience, thus allowing you to build your own career pathway.

**Subjects include:**

- LLB with Business UCAS Code MN11
- LLB with Criminology UCAS Code ML13
- LLB with Finance UCAS Code MN13
- LLB with Forensic Investigation UCAS Code MF14
- LLB with History UCAS Code MV11
- LLB with International Relations UCAS Code ML12
- LLB with Politics UCAS Code ML14
- LLB with Sociology UCAS Code ML15

**Your career**

The 'LLB with' courses offer the same employment attributes as the LLB Single Honours course but also provide you with additional skill sets associated with the other subject chosen.

## ADVERTISING

BSc Combined Honours in combination with Business Management, Marketing, Psychology, Media and Communications, Digital Media and Events Management

### Your course

The advertising industry is one of the fastest changing areas of business and marketing. The growth of digital media has created a huge range of communication channels, and has made advertising a challenging and fascinating industry that plays an increasingly important role in the global economy. This course offers a great opportunity to understand and be involved in this fast moving industry.

Our course is business focused, and designed to equip you with the knowledge, skills and confidence to work effectively in advertising and marketing. You will learn how to combine creativity and business strategy, how the advertising and marketing industries work, how advertising messages communicate and persuade, and how to produce convincing professional presentations.

### You will explore areas including:

- advertising campaign development
- marketing principles and practice
- consumer behaviour.

You can study advertising only as a combined honours degree in combination with Business Management, Marketing, Psychology, Media and Communications, Digital Media and Events Management.

### Your career

You will be equipped to work in a wide and varied range of roles across the advertising industry, from specialist advertising and media agencies to working within in-house marketing departments. There are also opportunities to work in brand management and communication, digital marketing, social media strategy, and media planning. Alternatively, you may wish to go on to postgraduate studies in marketing, brand communications and branding strategy.

## FILM PRODUCTION

BA Single Honours

### Your course

Film Production is a practice-centred course that will provide you with a mix of technical, production and business skills required for the ever expanding creative industries.

The demand for craft skills continues to be motivated by content-hungry areas in film, prime-time drama, streaming and web-based production.

You will use a range of digital cameras including Panasonic, Canon and Blackmagic Ursa Mini Pro. There are sound recording studios and a variety of mixers and portable sound kits, including MixPre-3. There is also a range of location lighting and grip equipment. Post-production facilities include Avid Media Composer and you will have access to Pro Tools, grading software and access to the full Adobe Creative Cloud Suite.

Regular visits from film professional practitioners will enrich your studies and offer up to the minute insights into industry practices.

### You will explore areas including:

- sound
- editing
- cinematography
- screenwriting
- directing
- documentary.

The first year provides a foundation in essential craft skills and the second and third years allow you to direct your interests towards a specialisation. Key employability skills run throughout the Film Production degree.

### Your career

Film Production prepares you for entry into the industry that could lead to roles such as: camera operator, focus-puller, digital imaging technician, lighting assistant, grip, researcher, production manager, assistant director, casting associate, production manager, sound recordist and mixer, editor, and sound designer. Our alumni have made successful careers directing feature films and adverts, as well as becoming producers, cinematographers and editors.

## DIGITAL MEDIA

BA Single Honours or in combination with another subject

### Your course

The digital world is increasingly shaping the way we think, communicate, work and play. Our Digital Media degree will help you to become a creative producer with an array of technical and design skills, giving you the ability to produce original and striking multimedia projects across a range of platforms. Using industry standard facilities, you will develop a detailed knowledge of digital media tools alongside an understanding of the history and theory of digital media.

### You will explore areas including:

- augmented reality
- computer animation, both 2D and 3D
- digital imaging and photography
- graphic design and visual communication
- video production and motion graphics
- web design and scripting.

We put you, the student, at the centre of our teaching, enabling you to develop your own voice and visual style. By your final year you will have produced a portfolio of dynamic and varied multimedia work and be confidently developing innovative answers to creative problems.

### Your career

On graduation you will be in a great position to pursue a range of careers in a marketplace that increasingly requires skilled digital media practitioners, either in salaried roles or as freelancers. Example pathways include, but not limited to, web design, graphic design, animation and video production.

Alternatively, you may wish to continue your education through postgraduate study.

## FILM, RADIO & TELEVISION

BA Single Honours or in combination with another subject

### Your course

Studying Film, Radio and Television (FRTV) at Canterbury Christ Church University gives you the opportunity to learn about, and work in, a variety of media.

Working both individually and as part of a team, you will explore theory and practice as you develop the production and analytical skills you need to succeed in the emerging media landscape. Using industry standard equipment and facilities, you will be well equipped for entry into the media industries.

You will have access to our industry standard television studio and gallery. A variety of different digital film cameras including the Blackmagic Ursa Mini Pro. A wide-range of location lighting and grip equipment. Post-production facilities include AVID Media Composer, the Adobe Creative Cloud Suite and After Effects software on a specialist EditShare server.

We have four dedicated radio studios, a student radio station CSR (Canterbury Student Radio) run in a collaboration between FRTV students at Canterbury Christ Church University and the University of Kent.

The course has employability at its core with dedicated modules taught in each year. The course is taught by experienced and passionate tutors. In addition, visiting industry professionals and alumni will offer you guidance and advice through workshops and dedicated masterclasses.

### You will explore areas including:

- film production
- radio production
- television production
- critical theory
- how to get work in the creative industries.

### Your career

Our graduates have gone onto successful careers as film and TV directors, writers, editors, producers and presenters. The transferable skills delivered by the programme are also valued in a wide-range of other graduate professions.

## MARKETING

BA Single Honours

### Your course

In a highly competitive business world, excellent marketing has become essential for most organisations. This course will give you a solid base of knowledge of both the practical and the theoretical aspects of this core part of business. You will gain a solid understanding of how marketing works and how it fits within a wider environment. Applied projects will give you the confidence to put theory into practice, using the many different aspects of identifying, understanding and satisfying customers' needs.

You will gain the business, marketing, employability and digital skills that are essential for a career in this dynamic area.

### You will explore areas including:

- marketing planning and strategy
- market research
- consumer behaviour
- global marketing and communications.

### Your career

The course provides the knowledge and skills to help in a range of marketing roles, such as account management, general marketing, market research, digital marketing, content management, fundraising, public relations, internal communication, and media planning across a range of businesses in all sectors. You will also be well placed to continue your studies at postgraduate level in marketing or branding and communications.

## MEDIA & COMMUNICATIONS

BA Single Honours or in combination with another subject

### Your course

As social media companies sell personal data and foreign policy is conducted by tweet, it is more important than ever to understand media and communications. If you use Instagram or Snapchat, if you play computer games or the latest music, if you binge on Netflix, or if you want to be a vlogger, then Media and Communications is the degree for you. We will help you design webpages, write perfect copy and explore and apply techniques of advertising and public relations. We will show you how the media is regulated and how it works, as well as aiding you to reach as wide an audience as possible. The media and communication industries will continue to grow and there are endless opportunities for you to find a rewarding career within them.

### You will explore areas including:

- advertising and public relations campaigns, blogs and digital design pieces, including short films and apps
- the meanings of adverts, texts or films, and how media organisations work

- research, applying methods such as questionnaire surveys, content analysis, focus groups and interviews
- practical experience in an international context, with an option to participate in a field trip in Europe.

### Your career

Our graduates have gone on to work in local and national media, journalism, PR agencies, events promotion, advertising, media planning, media relations, media sales, the music press, online publishing, press and publicity offices, corporate communications, external relations, graduate management, and market research. Some of our graduates have continued projects that were developed as part of the degree. You will be well placed for further study to undertake Masters or Doctoral degrees or teacher training.

## PUBLIC RELATIONS & MEDIA

BA Single or Combined Honours

### Your course

Accredited by the Chartered Institute of Public Relations, your course offers you the chance to develop your skills and knowledge in the inter-linked disciplines of public relations and media. This degree also benefits from Partner University status with the Public Relations Consultants Association (PRCA).

You will develop your talent for communication and learn how to identify a target audience, prepare effective messages and select appropriate media channels. You will learn how to use social media and develop creative and digital skills to influence audiences on behalf of your clients.

You will benefit from a multidisciplinary approach, taught by academic experts, experienced practitioners, guest speakers, and a 'learning-by-doing' approach.

### You will explore areas including:

- public relations planning and campaigns, blogs and digital design pieces, including short films and apps
- the changing shape of the media industry
- how words and images create meaning.

### Your career

Our graduates have gone on to successful careers in public relations, advertising and marketing. The communication skills delivered by the course are also a springboard to employment in a wide range of graduate jobs in business, education and the charity sector. Alternatively you may wish to continue your education through postgraduate study.

## MULTIMEDIA JOURNALISM

BA Single Honours

### Your course

Learn to be a journalist – the best job in the world, according to Nobel Prize winner Gabriel García Márquez. You will embark on a challenging, exciting and engaging three-year journey from news novice to a multi-skilled, multi-platform, social media-savvy, 21st Century journalist. Experienced professionals will teach you how to generate journalism across TV, radio, newspapers, magazines and online, giving you an outstanding foundation for whichever sector of the journalism industry you choose to enter. Our course is fully accredited by the Broadcast Journalism Training Council (BJTC). Certain assessments within the programme must be passed in order for you to graduate with this qualification. Any student that does not pass these will transferred to a non-accredited BA (Hons) Journalism Studies which is identical except for the professional accreditation.

From day one we regard you as a student journalist, constantly seeking out your latest exclusive – fizzing with engaging multimedia content – to add to your ever-growing online

portfolio. And we want to see you throwing yourself into our three student media outlets to further hone your skills – Unified, CSR Radio and CCTV.

### You will explore areas including:

- online, TV and radio journalism
- newspaper and magazine journalism.

### Your career

You will be equipped to apply for entry-level roles across the journalism and the wider media and communications industries. Alternatively, you may wish to continue your learning through postgraduate study.

Medicine.

# KENT AND MEDWAY MEDICAL SCHOOL

“ At Kent and Medway Medical School we expect academic ability, but equally we are looking for the right personal qualities that people require in a good doctor. ”

You  
can.

**Professor Chris Holland**  
Dean of Kent and Medway  
Medical School

# Why Kent and Medway Medical School?

Our new medical school will inspire the next generation of medical professionals.

Medicine is challenging, mentally, physically and emotionally. Doctors need to combine expert clinical skills and confident decision-making with compassion, dedication and a commitment to improving lives.

At Kent and Medway Medical School (KMMS), we want to attract talented students from all backgrounds to take up that challenge and help us to transform the future of health care. We are looking for resilient students with the right personal qualities that a good doctor requires as well as academic ability.

KMMS is an exciting collaboration between Canterbury Christ Church University and the University of Kent. It builds on the existing high-quality clinical teaching and research strengths of both universities and is working in partnership with the highly regarded and well-established Brighton and Sussex Medical School for support and quality assurance purposes.

Our innovative and integrated curriculum, delivered by a wide range of expert teachers, uses person-centred approaches to develop understanding of people and population health needs. You will gain hands-on experience in service-learning modules delivered within the communities of Kent and Medway and beyond.

This preparation will support your development to become a compassionate, competent, caring and adaptable generalist, able to take advantage of the multitude of career opportunities in the healthcare settings of the future.

# Bachelor of Medicine, Bachelor of Surgery (BM BS)

Subject to successful progress through the General Medical Council's quality assurance programme.

## Your course

A five-year medical degree, awarded jointly by Canterbury Christ Church University and the University of Kent, leads to the qualification of Bachelor of Medicine, Bachelor of Surgery (BM BS).

The course run by Kent and Medway Medical School (KMMS) offers you the opportunity to experience a range of specialisms including general practice, mental health, acute care and the major surgical specialities. From the outset, you will undertake placements in a range of integrated medical, surgical, primary care and community settings, gaining vital hands-on experience, developing clinical skills and learning to work in collaboration as part of a multi-professional team.

As part of our innovative, integrated curriculum, you will learn in small groups and through time spent with some of the best medical educators in their field. You will learn anatomy and physiology in a modern, well-equipped anatomy learning centre. Through the first two years you will use a mixture of dissection and prosections (pre-prepared anatomical specimens), as well as sophisticated radiological imaging to learn about all aspects of the human body.

You will have the opportunity to choose options to study in a wide range of other scientific and academic domains during your programme, even to take a year out and do an additional degree if your interest is strong enough.

An intercalated degree may condense a three-year BSc into one year, which makes it a challenging but rewarding choice. Alternatively, it may be possible to take an MRes or an MSc, if you are happy to undertake more independent study.

## You will explore areas including:

- Biomedical sciences
- Pharmacology
- Scientific enquiry and research
- Medical ethics and law
- Core practical skills
- General practice and community care
- Psychiatry and behavioural science
- Major medical and surgical disciplines.

Trainee doctors sit many exams and complete formal and informal assessments throughout their training, and university training is no exception. These are necessary to ensure that you are a safe, professional and knowledgeable doctor. You will have a combination of written assessments including essays, short answer questions and single best answers. We also test your professional values, communication and clinical skills through practical assessment methods.

- Your professional development is also tracked through assessments within the e-Portfolio, including feedback from colleagues and staff and reflective writing.
- Regular meetings with your tutors ensure that you are given support to keep on track and reach your full potential.

## Your career

- On completion of the course you will be an excellent doctor, equipped with curiosity, academic, professional and clinical skills to influence and improve future healthcare. You will be eligible to apply for a UK Foundation Programme job in the United Kingdom. This will provide you with the required postgraduate experience to gain full registration with the General Medical Council.
- After obtaining full registration, you will have the education and experience to apply for any one of over 100 possible medical specialties. Qualified doctors also work in media, arts, business, third sector, government, military, research and technology industries.
- There are national programmes available for medical graduates to obtain specialist postgraduate training and experience in leadership, management, entrepreneurialism and research.

## Did you know?

- KMMS will have state-of-the-art medical school facilities at both the Canterbury Christ Church and University of Kent's campuses and have access to facilities that will offer interprofessional learning environments.
- You will have the opportunity to study to be a doctor in a modern, vibrant, interprofessional health and technology community. You will study alongside other health professions students and students from engineering, humanities and social sciences programmes taking advantage of the combined resources and opportunities of two excellent and highly-regarded institutions.

**DANCE EDUCATION**

BA Single Honours

**Your course**

This course has employability for careers in dance at its heart. You will spend most of your time in dance studios where you will work with dance practitioners, educators, artists, choreographers and academics to develop technically and creatively as a dancer, choreographer, dance practitioner/educator, dance historian, dance scientist and dance researcher. You will work with dance artists and choreographers such as Akosua Boakye, Dam van Huynh, Russell Maliphant, Ash Mukherjee, Vinicius Salles (Jasmin Vardimon) and Kenrick Sandy (Boy Blue International). The academic team are all practice-led and active researchers in the fields of dance and dance education. The Subject Lead, Dr Angela Pickard, is Editor in Chief for the international journal in dance education: *Research in Dance Education*. This course also has superb links with places and spaces for dance and dance education including a number of primary and secondary schools, The Royal Ballet School, Jasmin Vardimon Dance Company, The Marlowe Theatre, Turner Contemporary and Canterbury Pilates and Movement Studio. If you want to share your creativity and passion for dance with others, then this programme is for you.

**You will explore areas including:**

- dance techniques e.g. ballet, jazz, Contemporary Limón, Contemporary Release, Urban, West African, South Asian and Repertoire
- dance practitioners, educators, artists, choreographers and academics
- choreography (e.g. theatre, installation, site-specific, for camera, digital)
- dance pedagogy (teaching and learning)
- dance science, body conditioning, fitness and Pilates
- dance landscapes past, present and future dance placements, performances and projects
- working towards your career in dance.

**Your career**

You will be equipped with a deep understanding of dance education and dance, particularly in its relation to education, community, health, fitness and performance. You will be able to apply a diverse spectrum of skills to a range of dance or arts related careers such as dancing, teaching, project management and freelance artist. You may also wish to go on to further study.

**MUSIC: BACHELOR OF ARTS**

BA Single Honours

**Your course**

The BA Music course is a single honours programme designed for students with a background in classical music, and allows you to develop your skills in areas such as performance, composition and musicology. You can choose from a range of optional modules in areas such as community music, performance, composition for media and film, and music business. Your tutors are highly skilled musicians with real world international experience.

**You will explore areas including:**

- music history and musicology
- music theory and analysis
- composition
- music technology.

**Your career**

You will gain the skills and knowledge needed to begin a career as a creative practitioner in a number of music industry roles such as instrumental tutor, composer, arranger or researcher, as well as a range of other graduate jobs in arts administration or management. You may also consider training to teach in schools or further education, or continue your education by progressing on to Masters degree qualifications.

**MUSIC: CREATIVE MUSIC PRODUCTION & TECHNOLOGY**

BA Single Honours

**Your course**

Creative Music Production & Technology develops your skills in studio and computer-based sound production, electronic composition, music technology and audio software development. You will study industry standard techniques alongside other creative methods of production for song writing and composing for a variety of media. You will develop your creative ideas in our digital studios and will be given the opportunity to perform or exhibit your work in a range of contexts, such as performances, installations and websites.

**You will explore areas including:**

- studio production
- software-based music production
- composition and creative audio technology
- music business and enterprise.

**Your career**

This course aims to prepare you as a creative practitioner in music technology and studio production or commercial composition (as a songwriter, or media and film composer). Graduates from our courses have gone on to work as freelance performers or producers, DJ's, songwriters, web designers, live sound engineers and freelance instrumental and vocal tutors. Some graduates have decided to train to teach in schools or further education while others have elected to continue their education by progressing on to Masters degree qualifications.

**MUSIC: COMMERCIAL MUSIC**

BA Single Honours

**Your course**

Commercial Music develops your skills as a musician in popular music. You'll have opportunities to perform, produce and compose music (as a songwriter, or for media and film for example), and to develop associated skills in performance across a range of styles for stage, screen and studio environments. Your tutors are highly skilled musicians with real world international experience in the music industries.

**You will explore areas including:**

- performance
- production
- composition and songwriting
- notation and theory in popular music
- music business and music enterprise.

You will be taught by a dynamic team of tutors, many of whom work as performers, songwriters, music producers and composers, who are dedicated to enabling you to enhance your skills as a musician.

**Your career**

You will gain the skills and knowledge needed to begin a career as a creative practitioner in pathways such as freelance performance and production, commercial composition (as a songwriter, or for media, for instance), teaching and instrumental tutoring. Alternatively, you may elect to continue education through postgraduate study.

**MUSICAL THEATRE**

BA Single Honours

**Your course**

The Musical Theatre degree offers a practical and academic study of the context, evolution, and performativity of contemporary Musical Theatre. This is distinct from programmes which focus purely on the development of Musical Theatre performance skills, traditionally the preserve of vocational drama/performing arts school training. Our Musical Theatre degree offers you the opportunity to study all three disciplines of dance, singing and acting. There are also showcase events built into the course at the end of each year.

**You will explore areas including:**

- dancing, singing and acting for musicals
- performance
- production arts e.g. stage management, lighting, sound, and theatre design.

**Your career**

You may wish to develop a career in an aspect of performance, community or production arts as a project manager, freelance performer or community practitioner. Alternatively, you may choose to embark on further study.

**DURATION**

3 years full-time

**LOCATION**

Canterbury

**UCAS CODE**

**THEATRE TECHNOLOGY & PRODUCTION**

BA Single Honours

**Your course**

If you are interested in those areas dedicated to the support of theatre technology and production, then this degree is for you. You will construct and operate lighting rigs, run live sound PA systems, explore theatrical design concepts, create video design concepts, and develop skills in stage and production management.

**You will explore areas including:**

- soundscape
- lighting choreography
- interactive installation systems,
- video projection mapping.

**Your career**

As a successful graduate you could find yourself working within a theatre technical department, technical support for cruise ships, school and college technical support, sound engineering, video design, stage management, company management or theatre design.

**DURATION**

3 years full-time

**LOCATION**

Canterbury

**UCAS CODE**

**PERFORMING ARTS**

BA Single Honours

**Your course**

If you're interested in a range of disciplines such as dance, drama, vocal studies or creative theatre production then this course is for you.

You can choose to pursue a number of disciplines or specialise in one, giving you the flexibility to develop your art as you get to grips with the realities and practicalities of performing arts production.

**You will explore areas including:**

- performance
- production presentation through stage craft, theatre design, lighting and sound techniques
- the arts community.

**Your career**

You will be equipped to develop a career in, for example, stage management, project management, technical theatre, dramaturgy, directing or as a freelance practitioner. You may want to engage in further study.

**ANIMAL SCIENCE**

BSc Single Honours

**Your course**

Animal-based enterprises operate in a tightly regulated environment and require well trained, knowledgeable professionals with knowledge of animal welfare, health and behaviour.

You will develop a detailed knowledge of animal husbandry, genetics, molecular biology, and biochemical and physiological processes, and have the opportunity to interact and work with a range of employers in the field. You will be able to take advantage of industrial collaborations with specialist research-based companies, including animal breeding and research companies, through the Industry Liaison Lab at Discovery Park, Sandwich.

**You will explore areas including:**

- animal anatomy and physiology
- genetics of animal breeding
- animal pests and diseases.

**Your career**

You can use your training to pursue a range of career opportunities, including academic or industrial research, project management, scientific communication or employment in animal-based enterprises. Alternatively, you have the option to take on further study through taught or research-based postgraduate training, including MSc by Research or MPhil/PhD, or by pursuing studies in veterinary medicine.

BSc Single Honours or in combination with another subject

**Your course**

Biology-based enterprises often operate in a tightly regulated environment requiring well trained, knowledgeable professionals, with a knowledge of animal welfare, health and behaviour, or plant health and physiology. This course provides an opportunity to gain a strong foundation in the skills and knowledge required to forge a career in this fascinating area.

You will have the opportunity to interact with a range of employers in the field, including: the Industry Liaison Lab at Discovery Park (in Sandwich), Howletts and Port Lympne Zoos, Wildwood and Wingham Wildlife Park, Thanet Earth, FAST and Brogdale.

**You will explore areas including:**

- taxonomy
- animal anatomy and physiology
- plant physiology and development
- microbiology.

**Your career**

You can use your training to pursue a range of career opportunities, including academic or industrial research, project management, scientific communication, working for regulatory or advisory organisations, and working in plant- or animal-based enterprises. Alternatively, you have the option to take on further study through taught or research-based postgraduate training, including MSc by Research, MPhil/PhD, or a PGCE.

**BIOCHEMISTRY & BIOLOGICAL CHEMISTRY**

BSc Single Honours

**Your course**

Biochemistry and Biological Chemistry, represents a modern degree that draws from both biochemistry and chemistry and focusses on the study of life at the molecular level.

This exciting area of the sciences is at the core of a rapidly expanding sector, making it an excellent choice if you want to pursue a career in scientific research or in industry.

Our course offers you the opportunity to receive expert research-informed teaching in a variety of core topics specifically relevant to industry. You will learn how to apply a theoretical scientific knowledge base to active research areas that address contemporary challenges. Further, you will develop your practical skills by undertaking a significant amount of laboratory work.

The course will take a practical, project-based approach to teaching and learning based on the CDIO (Conceive, Design, Implement and Operate) engineering education method. This will help you to develop your personal, interpersonal, teamwork and problem solving skills, allowing you to spend more time "doing science", making learning more effective and exciting.

This course is associated with the Industry Liaison Lab at Discovery Park, Sandwich, where laboratory sessions will be undertaken in specialist industry facilities.

**You will explore areas including:**

- biomolecules, basic life processes, biological catalysis and control
- analytical, physical and organic chemistry
- computational biology and advanced techniques in biochemical analysis.

**Your career**

This course has been designed with input from industry to ensure that you gain the necessary skills and knowledge to embark on a career in chemical sciences, laboratories, wider areas of the science sector, or in research and education.

Example career paths for graduates include working within pharmaceutical, chemical or biotech companies, or progression onto higher degree programmes in the biochemical field.

**BIOMEDICAL SCIENCE**

BSc Single Honours

**Your course**

Biomedical Science operates in a regulated environment and needs well trained professionals with a knowledge of human physiology, human disease and genetics, as well as possessing strong laboratory and computer analytical skills.

This course will provide you with knowledge in all these areas, as well as developing the practical skills desired by industry employers.

Through our 'Added Value' course you will have the opportunity to undertake specialist training to meet your own individual career aspirations, including optional placements, internships and volunteer opportunities. You will also be encouraged to broaden your experience by interacting with a range of employers through the Industry Liaison Lab at Discovery Park, Sandwich.

**You will explore areas including:**

- techniques in clinical laboratory specialities
- human anatomy and physiology
- human reproduction and development.

**Your career**

The course allows graduates to enter a wide variety of career pathways, or continue to postgraduate study. The course forms a solid platform of knowledge permitting graduates to undertake subject specific training in areas such as human genomics, clinical biochemistry and clinical microbiology

**MSci** This course comes with the option of continuing onto an Integrated Masters.

**CHEMISTRY FOR DRUG DISCOVERY**

BSc Single Honours

**Your course**

Drawing on both biochemistry and chemistry, this course focuses on the development, approval, manufacturing and marketing of pharmaceutical products at both a research and production level. This critical area of the sciences is at the core of the rapidly expanding healthcare sector, making it an excellent choice for those wishing to pursue a career in scientific research or in industry.

You will receive expert research-informed teaching and learn how to apply a theoretical scientific knowledge base to active research areas and develop practical skills by undertaking a significant amount of laboratory work. Further, you will take a project based approach to teaching and learning based on the CDIO (Conceive, Design, Implement and Operate) engineering education method, which will help you to develop your personal, interpersonal, teamwork and problem solving skills, allowing you to spend more time "doing science", making learning more effective and exciting.

You will have the opportunity of studying at the Industry Liaison Lab at Discovery Park, Sandwich.

These professional laboratories have specialist industry facilities where we work closely with local science employers on collaborative research projects.

**You will explore areas including:**

- basic life processes and biomolecules, chemistry and introduction to drug discovery processes
- enzymology and kinetics, analytical and pharmaceutical chemistry
- advanced techniques in biochemical analysis, advanced chemical synthesis, biotechnology and major therapeutic areas.

**Your career**

This course has been designed working with industry experts to ensure you gain relevant skills and knowledge to enter a career related to drug discovery and the wider sciences, from working in laboratories to undertaking research or teaching.

Example career paths for graduates include working within pharmaceutical, chemical or biotech companies or progression onto higher degree programmes in the wider science field.

**BIOMOLECULAR SCIENCE**

BSc Single Honours

**Your course**

The biotechnology sector is developing rapidly, offering you many exciting career opportunities, especially within biomedical and pharmaceutical companies. This course encompasses the study of the genetics, biochemistry and the molecular biology of organisms, and you will gain important skills and knowledge in these disciplines.

You will be able to take advantage of our excellent industry links, interacting with biotech companies and gaining valuable experience. A significant portion of your studies will take place at our innovative Industry Liaison Lab at Discovery Park, Sandwich where we have collaborations with a number of research-based companies. The industry-focused nature of this course provides opportunities to enter direct employment with biotech companies.

**You will explore areas including:**

- genetics and evolution
- molecular biology and biotechnology
- bioinformatics.

**Your career**

You can use your training to pursue a range of career opportunities, including academic or industrial research, project management, scientific communication or employment in the biotech sector. Alternatively, you have the option to take on further study through taught or research-based postgraduate training, including MSc by Research or MPhil/PhD.

**ECOLOGY**

BSc Single Honours

**Your course**

Ecology encompasses the study of organisms and their interactions with the environment. As such it has implications for many aspects of human society and development as we tackle major global issues.

This course places a particular emphasis on developing your field skills, and you will have the opportunity to gain experience by spending a minimum of 30 days in field-based study or experimentation. You will also be encouraged to interact and work with a range of employers in the field, including: Howletts and Port Lympne Zoos, Wildwood and Wingham Wildlife Park, and Natural England.

**You will explore areas including:**

- animal ecology
- plant ecology
- molecular ecology
- conservation biology.

**Your career**

You can use your training to pursue a range of career opportunities, including academic or industrial research, project management, scientific communication, or employment with regulatory and advisory organisations. Alternatively, you have the option to take on further study through taught or research-based postgraduate training, including MSc by Research or MPhil/PhD.

**HUMAN BIOLOGY**

BSc Single Honours

**Your course**

Human Biology is at the core of a rapidly expanding sector, offering the opportunity to participate in specialist training that can accommodate a range of career aspirations within healthcare or biomedical research.

This course offers a unique blend of fundamental Biology integrated with aspects of Sport and Exercise Science. You will study normal human form and function as well as the processes that occur during the development of disease. You will also study genetics, biochemistry and molecular biology.

You will be taught by experts who have been recognised for their high quality teaching, ensuring that you are studying up-to-date and relevant material. You will undertake a significant amount of laboratory work as part of the course enabling you to develop strong practical skills. Furthermore, you will have the opportunity to get involved with ongoing research relevant to the field of human biology.

**You will explore areas including:**

- human anatomy and physiology
- human health and disease
- human genetics
- sport and exercise training

**Your career**

You can use your training to pursue a range of career opportunities, including academic or industrial research, project management, scientific communication, pharmaceutical product design and manufacture, or healthcare and sports healthcare. Alternatively, you may pursue postgraduate study or training, including MSc by Research or MPhil/PhD, or a postgraduate diploma in Physician Associate Studies, enabling advanced training for a career in clinical healthcare.

In addition, postgraduate entry into Medicine or the Scientific Training Programme (STP) are available if you wish to pursue a career in healthcare or sport and exercise medicine.

## INTERNATIONAL RELATIONS

BSc Single Honours or in combination with another subject

**Your course**

Why do states co-operate or collide? What are the effects of globalisation? As long as there have been states, there has been negotiation, cooperation and war.

Taught by experts in a stimulating and inclusive environment, the course offers a historical understanding of the development of nation states and its contemporary relevance. It examines what obligations states might have in today's international society and explores the links between identity, conflict and models of governance to deal with the challenges of the 21st century.

**You will explore areas including:**

- international relations theories and their modern relevance
- analysis of regional and global organisations, and their role in promoting international peace and security
- legacies of colonialism and the Cold War
- contemporary issues, such as migration, global poverty, climate change, energy security, and competition for finite resources.

**Your career**

We place a strong emphasis on transferable skills with a focus on employability. You will gain skills in critical thought and analysis, team work, and the ability to communicate complex ideas clearly and effectively. International Relations graduates are now working in a variety of sectors, including the civil service, international non-governmental organisations, journalism, law, and teaching. Many students go on to study at postgraduate level.

## PSYCHOLOGY

BSc Single Honours or in combination with another subject

**Your course**

Psychology seeks to understand thoughts, emotions and behaviour through scientific study. You will be exploring an inherently fascinating and useful subject that offers you many opportunities for future development and employment.

We emphasise the uses of psychology in the real world, and you will gain an insight into its practical application. You will have the opportunity to study the core areas of this diverse subject and pursue areas of specialism under the guidance of expert staff.

Employability, research skills, practical application and personal development are embedded within our course from start to finish.

**You will explore areas including:**

- the social and developing self
- brain, mind and behaviour
- research methods in psychology.

**Your career**

Your degree is a great springboard into a career in the caring professions, education, business and management, or other people-focused occupations. Our course is accredited by the British Psychological Society, our single honours and major routes give you the opportunity to gain the BPS Graduate Basis for Chartered Membership (GBC), the first step towards becoming a Chartered Psychologist, allowing you to pursue postgraduate vocational training in areas such as clinical psychology, educational psychology and health psychology.

## POLITICS

BSc Single Honours or in combination with another subject

**Your course**

Our world is in flux. As our traditional political "certainties" crumble, the skills of clear-sighted political analysis are needed more than ever before.

Our Politics degree situates the big issues of the day in their historical and philosophical contexts. It explores continuity and change in local, national and global dimensions of politics, and scrutinises political ideas, structures and approaches that will help you to understand our complex, and ever-changing circumstances.

We pride ourselves on the warm atmosphere and inclusive spirit of our learning environment and we place you at the centre of everything we do.

**You will explore areas including:**

- political systems in the UK, Europe, and across the globe
- contemporary political philosophy and political ideologies 'in action'.
- current debates about the politics of austerity, climate change, social inequality, populism, and democracy.

**Your career**

We place a strong emphasis on helping you to gain the transferable skills that employers are looking for. You will develop skills in critical thought and analysis, working as part of a team, networking, and the ability to communicate complex ideas in a clear and concise fashion. You will be well placed to enter roles in a variety of sectors such as national or local government, non-governmental organisations, journalism, or teaching. Alternatively, you may wish to go on to study at postgraduate level or join a graduate training scheme.

**SOCIOLOGY**

BA or BSc single honours or in combination with another subject

**Your course**

Join our vibrant and inclusive learning community to investigate the ways in which social life is organised, structured and experienced. You will be inspired by our engaging, relevant curriculum and our interactive teaching, and supported by our committed tutors.

Alongside taught modules, you will have the chance to engage in research yourself. Your employment prospects will be enhanced through opportunities to work with stakeholders, undertake work shadowing, and volunteer in the community. This transformative degree will help you understand the social world and your place in it.

**You will explore areas including:**

- contemporary social issues and problems
- classical and contemporary sociological theory
- research methods.

**Your career**

As well as an appreciation of the impact of social factors on people's lives, you will gain transferable skills, such as critical and analytical thinking, effective written and spoken communication, research techniques and time and task management. Sociology provides a great foundation for occupations such as teaching, social and youth work, probation, local and central government, human resource management, social research, the police and journalism.

**SOCIOLOGY & SOCIAL POLICY**

BSc Single Honours

**Your course**

Combining the study of sociology and social policy enables you to build an understanding of how societies attempt to meet the needs of their populations at different points in time.

The course is stimulating, innovative and up-to-date, and aims to be highly relevant to your future career. As well as gaining a deep, practical understanding of social policy, you will engage with a range of intellectual traditions and social science disciplines and apply your knowledge to the study of current policies.

**You will explore areas including:**

- case studies in social policy
- classical and contemporary sociological theory
- research methods.

**Your career**

As well as an appreciation of the impact of social factors on people's lives and the dynamics involved in the making of social policies, you will gain transferable skills, such as critical and analytical thinking, effective written and spoken communication, research and, time and task management. A degree in Sociology and Social Policy provides a strong foundation for occupations such as teaching, social and youth work, probation, local and central government, human resource management, social research, the police, and journalism. You will gain skills and knowledge that can be applied to a wide range of other areas of employment, and equip you well for postgraduate study.

**PSYCHOLOGY (SPORT & EXERCISE)**

BSc Single Honours

**Your course**

Psychology seeks to understand human thoughts, emotions and behaviour through scientific study. You will be exploring an inherently fascinating subject within the specific contexts of sport and exercise, offering you many opportunities for future development and employment.

The applied nature of our course provides insight into those areas of psychology relevant to sport, exercise and physical activity. From the start, we place a strong emphasis on the practical application of psychological knowledge in the field of athletics and sports.

**You will explore areas including:**

- the psychology of sport, exercise and skill acquisition
- biological and cognitive psychology
- personality and individual differences.

**Your career**

This BPS accredited degree in Psychology (Sport and Exercise) is a great springboard to a career in the health and fitness professions, sport coaching roles or teaching, as well as the sport 'scientific support' area. You will also be well placed to consider careers in the wider psychology domain, the caring professions, education, business and management, and other people-focused occupations. You will gain a range of transferable skills that are highly valued in the broader job market.

**SPORT & EXERCISE SCIENCE**

BSc Single Honours or in combination with another subject

**Your course**

This engaging course offers you the opportunity to explore the science behind physical activity and sports performance.

Under the guidance of a dynamic team of research-active staff, you will study biomechanics, physiology, psychology and sociology, with an emphasis on practical application.

You will have access to well-equipped laboratories where you will gain valuable experience in measuring and assessing physical activity relevant to competitive sport and recreational exercise, fitness and health. You will also have the opportunity to work within our consultancy unit, SportsLab, using your expertise to help athletes improve their performance.

You can opt to follow a broad pathway through the sport and exercise sciences, or focus more specifically on competitive sport performance or exercise and health outcomes.

**You will explore areas including:**

- sport exercise and fitness
- applied sport psychology
- physical activity and health.

**Your career**

Your Sport & Exercise Science degree opens up routes into teaching, through the PGCE, and prepares you for further postgraduate study at all levels through to PhD. It also qualifies you for roles in sport, health and fitness publishing, physical activity and health administration and research, as well as the ever-expanding leisure industry. In addition, it provides an excellent foundation for careers in the public sector, including the medical professions and the police.

**SPORT & EXERCISE PSYCHOLOGY**

BSc Honours in combination with another subject

**Your course**

This thought provoking and highly stimulating combined honours course offers you the chance to study psychology and its application to sport and exercise in combination with another subject of your choice.

Guided by a dedicated team of research-active staff, you will explore a range of psychological themes and relate them to the unique environments of sport and exercise, applying them to real situations in an attempt to explain, predict or modify human behaviour.

**You will explore areas including:**

- the psychology of the individual
- social psychology
- motor skill acquisition and coaching
- health and physical activity.

**Your career**

The skills you will gain on your degree will open the door to a number of employment options. You could pursue a career in the healthcare professions, sports coaching or teaching, or you could work towards becoming an accredited sport or exercise psychologists, supporting professional athletes to achieve optimum performance. You may also consider postgraduate study up to and including PhD level.

## SPORT COACHING SCIENCE

BA Single Honours

### Your course

Sport Coaching Science offers you the opportunity to study and experience sport coaching from an applied base. You will explore the science behind sports performance and physical activity, and have access to a range of excellent coaching resources and sports facilities.

You will discover exciting modules in coaching theory and practice. In addition, you can study a range of sport-related subjects including physiology, psychology, sociology and analysis of sport performance.

To enhance your studies you will explore an extensive range of coaching strategies to understand best coaching practice at both participation and performance levels.

Importantly, students will have the opportunity to undertake coaching placements and work alongside expert coaches to provide valuable practical experience. You will be working in the second and third year with a coach mentor developing your coaching skills which frequently leads to employment in coaching after the placement ends.

### You will explore areas including:

- sport coaching pedagogy
- sport coaching in action
- sport coaching excellence.

### Your career

You will be in a great position to begin a successful career in sport coaching, sport development, sport teaching, sport related business, the armed forces or police. Alternatively, you may wish to pursue postgraduate study, including the option to take a PGCE.

## SPORTS THERAPY & REHABILITATION

BSc Single Honours

### Your course

You will develop the key academic and practical knowledge required to enter this contemporary and emerging field of work where graduate opportunities are extensive.

Sports Therapy and Rehabilitation offers a unique blend of theory and practice as you explore the sport and health-related issues which can impact sport performance.

Through studying the fundamental aspects of anatomy, physiology and biomechanics, alongside undertaking extensive practical work, you will develop key clinical skills to ensure you are prepared for the emerging opportunities in this field.

You will be joining a successful School with a longstanding reputation for delivering sport-related courses in Kent.

### You will explore areas including:

- sport rehabilitation
- strength and conditioning
- health screening and prevention.

### Your career

You can progress to postgraduate study or enter the emerging workforce of sport rehabilitators, therapists, health screeners, strength and conditioning advisors, to name but a few.

**ARTS IN EDUCATION**

BA Single Honours

**Your course**

Our BA Arts in Education is ideal if you are interested in any of the arts (e.g. art and design, ceramics, dance, drama, music etc.) and in creative aspects of education.

Whilst the degree includes practical experience to enhance learning, you do not need to have specific expertise in the arts to apply. It will provide you with a unique opportunity to gain knowledge and experience of why the arts are important, the role the arts play in education, as well as how we learn and teach in the arts.

The course capitalises on the wealth of leading arts organisations that have a presence locally and you will have a variety of opportunities to gain first-hand experience of the arts in education through workplace learning projects. There is also an opportunity to undertake work experience overseas.

**You will explore areas including:**

- impact of the arts
- models of arts in education
- arts and cultural partnerships
- educational landscapes.

**Your career**

On successful completion of the course you will have a wide variety of roles open to you, including education coordinator, museum and gallery officer, or you could gain a position within the television, radio or film industry. It also provides a route into teacher training or other postgraduate study such as our MA Arts and Cultural Management.

**CHILDHOOD STUDIES (TOP UP)**

BA Single Honours

**Your course**

This exciting area of study, designed for those with a relevant foundation degree, considers the influences that shape children's development and learning, their personalities, and the critical periods that will shape their journeys to adulthood.

We have designed this course for those working with children and young people aged 0-19 years in settings such as schools, nurseries, childcare, foster care, child minders, youth groups, cadets, or library services.

**You will explore areas including:**

- research methods
- issues relating to children and young people
- contemporary learning theory
- issues relating to work-based practice.

You will pursue your own work-based research, linking your studies to real-world experience in the workplace and developing your understanding of how children and young people learn.

The course also offers the option of a Special Educational Needs (SEN) pathway (if you have the required amount of credits in a SEN specialism), enabling you to explore the issues relating to this area of practice in greater depth.

**Your career**

Your Childhood Studies degree is the perfect stepping stone to a career working with children or young people, as well as roles such as social workers or speech therapists. It also provides a great platform to begin teacher training or postgraduate studies in a related subject.

**CHILDHOOD STUDIES**

Foundation Degree

**Your course**

This innovative, work-based course offers you the opportunity to gain a qualification while continuing to work.

We have designed this course specifically for those working on a paid or voluntary basis with children and young people in settings such as schools, nurseries, childcare, foster care, child minding, youth groups, cadets, or library services.

You will explore the relationship between theories of child development and practical application in the workplace where you will gain a valuable understanding of how children and young people learn.

**You will explore areas including:**

- learning theory
- developing positive behaviour
- curriculum subject areas
- different aspects of special educational needs and inclusion.

The course also offers the option of a Special Educational Needs (SEN) pathway, enabling you to explore the issues relating to this area of practice in greater depth.

**Your career**

Completion of your foundation degree will put you in a great position to progress on to a degree course such as our BA (Hons) Childhood Studies. This will enable you to access postgraduate study such as a Postgraduate Certificate in Education (PGCE), or you may consider a variety of courses in social work or specialist fields such as speech and language or art and play therapy.

**COUNSELLING, COACHING & MENTORING**

BA Single Honours

**Your course**

The 'helping professions' have experienced significant growth in the past decade. They offer a range of exciting career routes that are both challenging and rewarding.

The course will offer an introduction to the theories, concepts, practice and skills of counselling, coaching, mentoring and other therapeutic practices. It will give you the opportunity to develop your empathetic and interpersonal skills, assets that underpin many activities in work and in life, and are vital for building effective relationships with clients and others.

**You will explore areas including:**

- counselling and therapeutic practice
- coaching
- mentoring
- ethics and values
- working with clients in groups.

You will be taught by passionate and experienced tutors supported by a range of guest speakers, such as psychotherapists, counsellors, business coaches, careers consultants and art therapists working in social care, health, charitable and voluntary sector and private practice.

**Your career**

On completion of the course, you will have developed the knowledge, skills and experience necessary to enter a comprehensive range of roles within the helping professions, including employment options within health, education, human resources, social services and third sector organisations.

**EARLY CHILDHOOD EDUCATION & CARE**

Foundation Degree

**Your course**

This engaging and innovative work-based course offers you the opportunity to gain a qualification while continuing to work.

The course is specifically designed for those working with babies and young children, allowing you to utilise your practical experience in the workplace.

You will draw on multiple perspectives of early childhood and explore how different theories can be applied to working with young children and their families. You will gain skills and knowledge that will transform your practice and allow you to build strong partnerships with parents and other agencies.

You will also be able to share knowledge and experiences by joining the Early Childhood Society and the Holistic Early Learning and Development Research Group, and have the opportunity to listen to expert guest speakers at South East England Early Childhood Research and Practice Association events.

**You will explore areas including:**

- speech, language and communication from birth to five
- the importance of play and the environment for young children
- how young children learn and the theories surrounding development
- creativity, imagination and play to support critical thinking and problem solving
- working with families and other professionals.

**Your career**

On completion of your foundation degree, you are invited to apply for the BA (Hons) Early Childhood Education and Care in order to gain a full honours degree. This will enable you to access postgraduate study and professional training, such as routes into teaching, or health and social work professions.

**EARLY CHILDHOOD EDUCATION & CARE (TOP UP)**

BA Single Honours

**Your course**

The early-years workforce needs highly qualified and motivated graduates. This course will allow you to build on a relevant foundation degree whilst in employment to gain full honours.

Under the guidance of expert tutors, you will gain skills and knowledge that will transform your practice, gaining an in-depth understanding of different social and cultural perspectives of children's development and learning, their families, and their wider communities.

You will also be able to share knowledge and experiences by joining the Early Childhood Society and the Holistic Early Learning and Development Research Group, and have the opportunity to listen to expert guest speakers at South East England Early Childhood Research and Practice Association events.

**You will explore areas including:**

- leadership and management in early years
- social pedagogy and the children's workforce
- advocacy and social action with and for children
- developing an independent research project focussing on an area of interest in practice.

**Your career**

The course is designed to complement professional practice and is particularly suitable if you work with children in early years settings. Following successful completion of the course you may apply to study a PGCE (as a preparation for teaching) or another postgraduate course in a related subject, such as early years, social work, or speech and language therapy.

**EARLY CHILDHOOD STUDIES**

BA Single Honours or in combination with another subject

**Your course**

This captivating area of study explores how children develop, think and learn from conception to eight years old.

Under the guidance of expert and dedicated tutors, the degree offers a fascinating and stimulating academic course alongside practical insights about young children through practice-based experiences.

You will learn about the influences that shape children's lives and gain an excellent foundation and in-depth knowledge about children and their childhoods, preparing you for a range of diverse and fulfilling careers in the children and families workforce.

**You will explore areas including:**

- how children develop and learn
- children's health and wellbeing
- the influences of the media on children's lives
- working with children and families
- global perspectives on early childhood.

**Your career**

Our graduates enjoy successful careers across education, health, social care, research, policy and charity based settings both locally and globally. You will also be well equipped to pursue postgraduate study or undertake further professional training.

**HUMAN DEVELOPMENT, MIND, BODY & SPIRIT**

BSc Single Honours

**Your course**

This degree has been designed to provide a multidisciplinary approach with a strong science focus. It draws upon theory and research within different fields, including education, health, welfare, sociology, anthropology, social policy, philosophy, psychology and moral values.

You will consider the whole human lifespan, families and their wider communities, and in particular the interrelatedness of development and learning, and its cultural and biological determinants. You will also discuss, analyse, critique, explore, and evaluate how humans develop in relation to the three key areas of mind, body and spirit.

Our teaching team offers expertise across a range of disciplines, enabling you to gain the latest developments and insights from a wide variety of professions.

**You will explore areas including:**

- psychological development
- physical development and wellbeing
- spiritual development
- moral development
- research and student academic development.

**Your career**

Your degree offers you the possibility to enter a range of professions, including education, health, social care, wellbeing and therapeutic services. You will also be able to progress on to postgraduate study.

**EDUCATION STUDIES**

BA Single Honours or in combination with another subject

**Your course**

If you are passionate about how education has influenced your life or you are interested in the role education plays in shaping major issues facing the world, including topics such as sustainability and social justice, then education studies is for you.

Our course explores big questions about education through the lens of psychology, sociology, history and philosophy. You will engage with different approaches to learning and be able to compare education systems in a variety of countries to build an understanding of how people learn.

You will be taught by a team of experienced educators who believe that considering the wider purposes of education is of central importance in appreciating the world, its inhabitants, and the sometimes positive or catastrophic choices people make.

This course also gives you the opportunity to explore areas such as race, politics and representations of education in popular culture.

**You will explore areas including:**

- sustainability
- social justice
- the role of schools, universities, nurseries and other educational settings
- psychology of education
- volunteering and the role of education charities.

As part of your degree, you will have the opportunity to visit a range of educational settings, including ones overseas.

**Your career**

This degree will enable you to enter a wide range of careers, including educational publishing, museum and heritage work, corporate training or roles in educational charities, and local and national government. Many of our students go on to postgraduate study such as a Masters degree, PGCE or professional qualifications.

**MATHEMATICS WITH SECONDARY EDUCATION**

BSc Single Honours leading to Qualified Teacher Status (QTS)

**Your course**

If you have a love of mathematics and a passion for teaching and working with young people, this course combines the two, developing your teaching skills alongside your mathematical studies.

You will draw on expertise of two universities; the University of Kent for your mathematics and Canterbury Christ Church University for your mathematics education and teaching studies. You therefore benefit by studying at two universities within close proximity of each other in Canterbury and by having access to both universities' extensive resources.

**You will explore areas including:**

- probability and statistics
- applications of mathematics
- mathematics pedagogy
- research and enquiry in education.

**Your career**

The vast majority of our students go into employment as qualified teachers following completion of the course. There are a number of study options available to former students of this course at Christ Church during the Newly Qualified Teacher (NQT) year and beyond, which lead to Masters degrees in Education.

**PHYSICAL EDUCATION & PHYSICAL ACTIVITY**

Foundation Degree

**Your course**

The Foundation Degree in Physical Education and Physical Activity is your opportunity to begin a successful career in physical education, school sport and health promotion.

You will benefit from a course that is employment based enabling you to study for a degree whilst you work. The course will equip you with the knowledge, skills and understanding to develop your ability to be an effective practitioner.

Our links with external organisations including Kent Sport, the Kent School Games and various coaching companies will provide you with valuable opportunities to gain practical experience in the delivery of events and competitions.

You will have access to the University's multi-million pound Sports Centre, this includes an indoor sports hall, a fitness suite, a free weights area, a spin studio and a dance studio. You will also have access to the University's joint specialist sport facility, Polo Farm Sports Club.

**You will explore areas including:**

- physical education
- physical activity
- school and youth sport
- coaching, leading and managing
- health education.

**Your career**

As well as enhancing your current practice and gaining experience, you will have the opportunity to progress on to the BA (Hons) Physical Education and Physical Activity.

**PHYSICAL EDUCATION & SPORT AND EXERCISE SCIENCE**

BSc Single Honours

**Your course**

With an emphasis on the practical application of knowledge, this degree is ideal if you are interested in pursuing a career in the sport, fitness, health or leisure industries.

You will focus on problem-based learning and critical discussion, developing an informed perspective on critical issues relating to physical education and sport.

Our links with local sporting organisations Kent Sport, the Kent School Games and various coaching companies, provide you with opportunities to gain practical experience in delivering events and competitions. You will also have opportunities to gain experience in areas related to your chosen career path.

**You will explore areas including:**

- physical education
- physiology
- biomechanics
- psychology
- sociology.

**Your career**

You will be able to consider a variety of employment opportunities in physical education, the fitness industry, coaching, sports development and management. Your degree is also a great springboard into teaching, allowing you to progress on to the Postgraduate Certificate in Education (PGCE) or the School Direct routes in primary and secondary education.

**PRIMARY EDUCATION**

BA Single Honours with recommendation for Qualified Teacher Status (QTS)

**Your course**

Our BA (Hons) Primary Education will enable you to become a primary classroom teacher, supporting you in reaching the National Standards to be a Qualified Teacher (QTS).

During the course you will gain a strong understanding of children's learning and development, alongside experience of teaching the curriculum. Through the course, you will explore the nature of primary education and develop your own educational philosophy.

You will be taught by experienced tutors and gain insight from expert guest lecturers, while your specific age range expertise will be determined by your assessed school placement: 3-7 or 5-11.

**You will explore areas including:**

- child development and behaviour
- philosophy and sociology of education with links to social justice
- teaching and learning across the curriculum
- planning and assessment
- inclusion, safeguarding and special needs
- professionalism and leadership.

You will also have the opportunity to gain experience through a placement beyond mainstream school. This could be in a variety of settings which may include refugee centres and special schools. There are also opportunities for a self-funded international placement.

The course offers a Mathematics Specialism pathway; on which you will also study the most effective ways of teaching maths, alongside all of the curriculum subjects that children are taught. This pathway will lay the foundations for your future role as a mathematics specialist teacher.

**Your career**

The vast majority of our students go into employment as qualified teachers. You may also consider postgraduate study such as a Masters degree. There are a number of study options during your Newly Qualified Teacher year and beyond, leading to Masters degrees in Education.

**SPECIAL EDUCATIONAL NEEDS & INCLUSION STUDIES**

BA Single Honours

**Your course**

There is a great demand for skilled professionals who wish to nurture the lives and futures of children and young adults with special educational needs.

On the course you will explore the areas of teaching, social work and health, and gain the skills and understanding you need to enter a multidisciplinary workforce.

You will be taught by experienced professionals, providing a dynamic and engaging curriculum drawing on many academic fields, and have the opportunity to gain practical experience in work placements.

**You will explore areas including:**

- health and disability
- physical and sensory development
- speech and language development
- cognition and learning difficulties
- local, national and global issues surrounding special educational needs and inclusion.

During the course you will be given the opportunity to engage with teachers and learners with special educational needs in the UK and international settings.

**Your career**

You will have a range of career opportunities in different areas, including the health services, youth work, charities, local government and advocacy posts. Alternatively, you could consider postgraduate study, including Masters or qualifications in teaching, speech and language therapy or social work.

**PRIMARY EDUCATION (PART-TIME)**

BA Single Honours with recommendation for Qualified Teacher Status (QTS)

**Your course**

This part-time course of study is your chance to learn how to motivate and engage children in the classroom, making a positive difference to their lives.

Through an integrated course of academic learning and professional practice you'll gain a deep understanding of how children learn. This part-time route, has been specifically designed to allow you to combine both face to face contact, university sessions and home study.

You will be expected to complete weekly directed self-study from home through the University's virtual learning environment and to attend four/five sets of three consecutive university study days spread throughout each academic year. For example, these could be timetabled from a Thursday to Saturday.

Your specific age range expertise will be determined by your assessed school placements: 3-7, 5-11 or 7-11. Your studies and experiences will otherwise encourage you to engage with the wider 3-11 age-phase for primary and early years education in support of your developing professional understanding, employability and career.

**You will explore areas including:**

- child development and behaviour
- philosophy and sociology of education with links to social justice
- teaching and learning across the curriculum
- planning and assessment
- inclusion, safeguarding and special needs
- professionalism and leadership.

You will have the opportunity to gain experience through a placement beyond mainstream school. This could be in a variety of settings which may include refugee centres and special schools.

## EVENTS MANAGEMENT

BSc Single Honours or BA Events Planning as a combined degree with another approved subject

### Your course

The UK's creative, heritage and service industries attract many visitors, and events are at the heart of this business. A growing number of events, including festivals, conferences and sporting events, have created a demand for qualified events professionals.

As well as developing your analytical and critical reasoning skills you will gain practical experience of pitching and delivering events. The course is delivered alongside tourism and hospitality management related courses to enable students to capitalise on a wide range of expertise and research.

Whatever degree you choose to study within Tourism, Events and Hospitality, you will enjoy a fun and stimulating field trip to Tenerife (or similar) in year one, already included in your fees.

### You will explore areas including:

- introduction to the events industry
- contemporary issues in events and tourism
- marketing principles and practice for tourism and events.

### Your career

Your degree is a gateway to employment opportunities in a number of creative industries, including arts, sports, music, and conference management. Past graduates have gained places on national graduate placement schemes and secured employment in public and private sector events management roles, such as Events and Theatre Co-ordinator with ARRCC and Conference and Events Operations Manager with Holiday Inn.

## TOURISM MANAGEMENT

BSc Single Honours

### Your course

The tourism industry supports over 260 million jobs worldwide and offers a multitude of exciting opportunities for graduates.

You will gain specialist knowledge in tourism with an emphasis on business management, from experienced staff who are passionate about their teaching and research. Lectures and seminars are supported by a wealth of industry speakers, site visits and an international field trip. During your time with us you will be offered work experience, internships, and be able to take advantage of our exciting Tourism and Events Research Hub, which has a reputation for winning successful research grants and may provide you with further opportunities.

Whatever degree you choose to study within Events, Tourism and Hospitality, you will enjoy a fun and stimulating field trip to Tenerife (or similar destination) in year one, already included in your fees. Tourism students benefit from a second international field trip in year two, also included in your fees.

### You will explore areas including:

- introduction to tourism
- sustainable development and conservation
- management business performance.

### Your career

We have embedded career advice into our curriculum to put you in the best position to succeed in a wide range of roles — both in the public and private sectors — locally, nationally and internationally. These include: resort manager, tourist officer, destination manager, travel writer, tour manager, regional tourist managers, and visitor attraction marketing.

## HOSPITALITY MANAGEMENT

BSc Single Honours

### Your course

The UK hospitality industry is made up of over 180,000 businesses ranging from hotels to visitor attractions. It offers graduate roles in a variety of exciting and fast-moving working environments. The links between hospitality, tourism and events are important to the sector and you will study all three subjects while remaining focused on the specific demands made on managers.

You will be taught by knowledgeable staff who are passionate about their teaching and research.

During your time with us, you will be offered work experience/internships, and our innovative Tourism and Events Research Hub may offer you further opportunities. Additionally, you will have the opportunity to study a modern language.

Whatever degree you choose to study within Events, Tourism and Hospitality, you will enjoy a fun and stimulating field trip to Tenerife (or similar destination) in year one, already included in your fees. Tourism students benefit from a second international field trip in year two, also included in your fees.

### You will explore areas including:

- current trends in hospitality
- food around the world
- marketing principles and practice.

### Your career

The UK hospitality sector is vibrant and growing, with a wide variety of opportunities for well-educated and professional managers. The combination of the academic knowledge and practical experience you will gain is greatly sought after by employers and you will be well-placed to gain management roles in the hospitality industry. You will also be able to enter into a general business management role.

# Applying for your place.

---

# Your application.

We hope that what follows will help you when you come to complete your application. It is vital that you put as much effort as possible into completing the application for your chosen course. If you have questions, you can email us for advice: [courses@canterbury.ac.uk](mailto:courses@canterbury.ac.uk)

Canterbury Christ Church University encourages and welcomes applications from all students able to benefit from the course offered. Applications are considered individually and we take into account academic qualifications in addition to paying great attention to the personal statement and the reference(s) provided. All offers are tailored to individual applications.

## Choosing your courses

You should have made a decision about the subject area(s) you would like to study before applying.

## How to apply

**FULL-TIME:** For full-time courses in this undergraduate prospectus, application is made online through UCAS (Universities and Colleges Admissions Service). Please see page 176 for more information on applying via UCAS.

**PART-TIME:** Most, but not all, courses in this prospectus offer a part-time route. Students wishing to study part-time should check the Fact File on individual course pages to see if a part-time route is available. You can apply directly to us at [www.canterbury.ac.uk/online](http://www.canterbury.ac.uk/online)

There is further information for part-time students on the website. Normally part-time students take five or six years to complete their degree course.

## The personal statement

This is the most important section of your application. Try to include a wide ranging description of yourself that might include your study interests – what you enjoy about your current course(s).

It is also vital that you say why you have chosen the subject you are applying for. Include any work or other relevant experience you have done and the benefits it gave you. With teaching or health-related subjects, relevant experience in either a voluntary or paid capacity is highly recommended as part of your application.

You can also tell us about any career ideas you have for the future, and how your chosen course will fit into this. If you have interests outside school/college eg sports, theatre, travel, social activities, cinema, music, reading, tell us about them and how they've helped shape your personality.

If you apply for two very different subjects, it is essential that you do not give the impression that you are uncertain about what you want to study.

If you require any help with your personal statement please email: [courses@canterbury.ac.uk](mailto:courses@canterbury.ac.uk)

## The reference

You will need to provide an academic reference and your school or college will write a reference for you. If you are not currently studying we may accept professional references. If you are not able to provide a reference, email: [courses@canterbury.ac.uk](mailto:courses@canterbury.ac.uk)

## Applying for teaching after taking a first degree

A large number of people decide to take a first degree and then follow a one year Postgraduate Certificate of Education (PGCE) course to gain qualified teacher status (QTS). Students do progress from our undergraduate programmes onto the PGCE. However, this progression is not an automatic right. To gain a place on a PGCE course all applicants have to successfully pass the interview stage and Canterbury Christ Church applicants compete equally with graduates from other institutions.

For more information, visit: [www.canterbury.ac.uk/train-to-teach](http://www.canterbury.ac.uk/train-to-teach)

# Entry requirements.

## UCAS TARIFF

Most of our degree entry requirements are shown in terms of UCAS Tariff points – the level of qualifications you need to be considered for a place.

Currently the University asks for between 88 and 120 UCAS Tariff points for degree courses depending on the subject. For more information on our minimum entry requirements please see page 166.

Up to date information on a course by course basis can be found on the UCAS course search engine: <http://search.ucas.com>

The table below indicates the number of UCAS Tariff points that some of the more common qualifications are worth. This is just a guide and if your qualification is not shown here, check the tariff calculator on the UCAS website.

BTEC Qualification (QCF/RQF)				Tariff Points	GCE Qualifications	
Extended Certificate / Subsidiary Diploma	Foundation Diploma / 90-credit Diploma	Diploma	Extended Diploma		A-Level	International Baccalaureate Higher Level Certificate*
			D* D* D*	168

	PP			24	D	H5
				20		H4
P				16	E	
				12		H3

# Entry requirements.

## Additional entry requirements

Generally, offers will be made in terms of UCAS Tariff points but there are exceptions to this. Some courses require you to achieve specific grades in the qualifications you are taking and for some you will need to have studied a particular subject at Level 3 (A-level, BTEC, IBCP, OCR or equivalent). This will be made clear when an offer of a place is made.

Some courses, particularly those in the health and education subject areas, have their own additional entry requirements for instance English and Maths GCSEs, or evidence of work experience.

Please check individual course entries on our website for specific requirements.

## Accepted qualifications

The University considers applications from those with a wide range of general qualifications that attract UCAS Tariff points either on their own or in combination with others.

In the table below is a list of frequently accepted qualifications. The list is not exhaustive and if your qualification does not feature here please contact us for advice [courses@canterbury.ac.uk](mailto:courses@canterbury.ac.uk)

• A-levels	• Vocational A-levels	• Accredited Access qualifications
• Diploma in Foundation Studies (Art and Design)	• BTEC qualifications	• CACHE qualifications
• Cambridge Pre-U	• OCR qualifications	• Certificate/Diploma in Financial Studies
• Higher Apprenticeships	• International Baccalaureate	• Irish Highers
• NVQ 3 qualifications	• International Baccalaureate Career-related Programme	• Scottish Highers
• European Baccalaureate		• Welsh Baccalaureate

## GCSEs and their equivalent

For a small number of courses there is either a national or a University requirement to achieve grade C passes in specific GCSEs or the equivalent. From summer 2017 GCSE English and Maths exams are now graded 9 (highest) – 1 (lowest) instead of A-G. From summer 2019 all GCSE's will be graded this way. We will require applicants to achieve four or higher for those courses with GCSEs as part of the entry requirements. If you do not have GCSEs, the University will only accept Level 2 credits from accredited Access courses completed in 2014 or earlier as the equivalent to GCSE passes.

Functional skills at Level 2 are accepted for the Adult, Child and Mental Health Nursing degrees and for Midwifery, Occupational Therapy and Operating Department Practice. However, the University does not currently accept functional skills at Level 2 as the equivalent of GCSEs passes for any other degree programmes that recruit via UCAS. O-Levels sat in, or after, summer 1975 must be at grade C or above. CSE grade 1 is accepted as equivalent to GCSE at grade C.

## Access qualifications

We welcome applications from people who have, or are taking, an accredited Access qualification. Please check the tariff calculator on [www.ucas.com](http://www.ucas.com) to work out your UCAS Tariff points.

## International Baccalaureate Career-related Programme (IBCP)

The IBCP is a relatively new two-year international education programme. Applications from students who are taking or have successfully completed this programme are very welcome at Canterbury Christ Church University.

## Degrees with a foundation year

32-112 UCAS points inclusive of at least one A Level or equivalent depending on experience and subject mix; please see the individual courses on our website for details. If you have been out of education for some time relevant experience will be taken into consideration. Please call our Course Enquiry Team on **01227 928000** who will be happy to advise you.

## Foundation degrees and Diplomas of Higher Education

Generally applicants will be required to have 48 UCAS points inclusive of at least one A Level or equivalent.

## Direct admission to Year 2 or 3

We will consider applications to the second or third year of degree courses from suitably qualified applicants. Applicants should have passed one year (for entry to Year 2) or two years (for entry to Year 3) of relevant degree level study. Applicants should apply through UCAS indicating which year of entry they wish to be considered for. A transcript from your current/previous study is required.

## Accreditation of Prior Learning (APL) Accreditation of Prior Experiential Learning (APEL)

You may be able to demonstrate learning which has occurred in the past by way of certification or experience. This is particularly useful for mature students, who may have substantial experience and who may have taken short courses or professional training. Under normal circumstances, students may claim

up to a maximum of 50% of the total credit points required for an award, usually for learning which has occurred during the previous five years.

APL relies solely on the provision of evidence of learning by way of certification from another university or college. Applicants will need to provide appropriate documentation including certificates and details of the awarding body. This process may enable you to build directly onto your existing learning if you are choosing a course of study within the same discipline. Applicants should apply via UCAS.

## Non-UK qualifications

Non-UK qualifications equivalent to Level 3 study in the UK, GCSEs and the others mentioned above are accepted by the University. Further information on the equivalence of non-UK qualifications can be obtained by emailing: [ugadmssions@canterbury.ac.uk](mailto:ugadmssions@canterbury.ac.uk) or, if you are based overseas, from your local British Council office.

## Entry requirements.

### European Diploma Supplement

Students who have completed their course of study and become eligible for an award may obtain a supplementary document, called a European Diploma Supplement, which provides information about the award to universities and employers in other European countries.

For more information, please see:  
[www.canterbury.ac.uk/euro-dip-sup](http://www.canterbury.ac.uk/euro-dip-sup)

### Any questions?

If you have any questions about entry requirements, direct entry etc., please contact our Course Enquiry Team, who will be happy to help.

Email:  
[courses@canterbury.ac.uk](mailto:courses@canterbury.ac.uk)  
Telephone:  
**01227 928000**

### General minimum entry requirements

The University has general minimum entry requirements which all students must meet before they register with us.

At the point of registration onto the first year of a degree, we require you to have achieved:

- A minimum of two A Levels *or*
- a BTEC National Diploma *or*
- a combination of BTEC and A Level qualifications equivalent to two A Levels, such as a BTEC subsidiary certificate and one A Level *or*
- an Access to Higher Education Diploma *or*
- an International or Welsh Baccalaureate *or*
- a Higher National Diploma/Higher National Certificate *or*
- a minimum of two Advanced Highers from Scotland *or*
- the Irish Leaving Certificate *or*
- the European Baccalaureate Diploma *or*
- an equivalent overseas qualification.

For specific course entry requirements, please check the individual course pages on our website.

### Foundation years

We expect all school leavers registering onto a foundation year to have completed the equivalent of Year 13 in England, Wales or Northern Ireland or Scottish Advanced Highers.

### Mature students

If you have taken some time out of studying and are able to demonstrate your commitment to studying a degree then we will consider your application. You may not need to exactly meet our general minimum entrance requirements. If you are returning to education then we will consider both your prior experience and qualifications. For mature students with no formal qualifications, experience will be considered in lieu of any prior academic achievement.

For more information, please contact our Course Enquiry Team, who will be happy to help.

Email:  
[courses@canterbury.ac.uk](mailto:courses@canterbury.ac.uk)  
Telephone:  
**01227 928000**

# An offer of a place.

## Applicants for combined courses

There are over 20 subjects available within the combined honours scheme at the Canterbury Campus. The majority of subjects make a decision as to whether to offer a place based on the application form. Exceptions include: Creative Writing where there is a written task that applicants without the relevant A-level subjects might be asked to complete, and Dance where there are auditions. However, we reserve the right to interview applicants where we feel this would benefit both the University and the applicant.

Once the decision is taken, the University contacts UCAS and they let you know the outcome of your application. We will write to those candidates offered a place inviting them to visit us to meet academic staff, explore the campus and there is also the opportunity to visit the local area.

## Applicants for single honours courses

The majority of subjects make a decision as to whether to offer a place based on the application form and, as above, you will be informed of the decision by UCAS. For a number of single honours courses the University will select applicants for interview/audition. These include our range of Music and Performing Arts courses, Diagnostic Radiography, Journalism, Midwifery, Nursing courses, Occupational Therapy, Operating Department Practice, Paramedic Science, Primary Education and Social Work. However, this list is not exhaustive and the University reserves the right to interview applicants for any subject where we feel this would benefit both the University and the applicant.

## The interview

The aim of the interview/audition is threefold. Members of the academic staff will firstly want to explore with you your motivations for choosing the subject and secondly, your

knowledge of the subject area to which you have applied. Finally, the interview will give you the opportunity to meet academic staff and question them about the course and the University. Always remember that the interview is a two-way process. You need to assess whether the University is the right one for you.

Once the decision is taken, we contact UCAS and they let you know about the outcome of your application. You should normally expect to hear from them within two weeks of your interview/audition, unless we inform you otherwise. For more information, visit: [www.canterbury.ac.uk/interview](http://www.canterbury.ac.uk/interview)

## Information for applicants requiring DBS (Disclosure and Barring Service) clearance

If an offer of a place is subject to a DBS check, this will be stated in the relevant course entry on the online prospectus. We will assist you in the process of gaining your DBS enhanced disclosure certificate with further details provided once we progress your application. For more information visit [www.canterbury.ac.uk/DBS](http://www.canterbury.ac.uk/DBS)

## The framework for higher education qualifications in England, Wales and Northern Ireland

In this prospectus the structure of most courses is broken down into years (Year 1, Year 2 etc). The higher education framework uses levels rather than years, as it recognises that not all students study full-time. Within the prospectus each year equates to a 'level' as follows:

CCCUC Designation	HE Credit Level	Minimum Credits
Year 1	4	120
Year 2	5	240
Year 3	6	360

Part-time students typically study for half the time of full-time students. Therefore, for a part-time student 'Year 1' will take two academic years, 'Year 2', a further two academic years and so on. Further information on the framework for higher education qualifications in England, Wales, Northern Ireland and Scotland can be found at: [www.qaa.ac.uk](http://www.qaa.ac.uk)

## Equivalent Level Qualifications (ELQs)

An Equivalent Level Qualification (ELQ) is a qualification that is the same level of study, or lower, as one you already hold. For instance, if you apply to study a BA in English but you've already completed a BA in History, this would be an ELQ. If you plan to study for a qualification at the same level, or lower, you may not be eligible for any financial support towards your tuition fees and living costs – though there may be exemptions in certain personal circumstances. New students on most pre-registration Health courses are exempt from the ELQ rule, meaning you can access a second set of loans.

## Selection and Admissions policy

There is a University Selection and Admissions policy, copies of which can be obtained by writing to the Assistant Director (Admissions), Canterbury Christ Church University, North Holmes Road, Canterbury, Kent CT1 1QU or go to Downloads at: [www.canterbury.ac.uk/undergraduate-courses](http://www.canterbury.ac.uk/undergraduate-courses)

## Complaints

The University has policies and procedures in place for responding to applicants' complaints about the way in which we handled your application. A copy of the policy and procedures relating to complaints can be obtained from the Assistant Director (Admissions) (see address above) or go to Downloads at: [www.canterbury.ac.uk/undergraduate-courses](http://www.canterbury.ac.uk/undergraduate-courses)

# Funding your degree.

Higher education is free at the point of entry for most students through a Tuition Fee Loan.\* You may be able to get help with living costs too.

The Government, via the Student Loans Company, offers loans to cover your tuition fees and assist with your living expenses while you are studying.

Tuition Fee Loans are available to most students who meet the relevant eligibility criteria for full-time and part-time higher education courses (the latter has to be at a 25% intensity of a full-time course), except those who already have a higher education qualification.

It is possible to access a student loan if you are studying a PGCE as a second degree. Students studying nursing, midwifery and most allied health professional subjects as a second degree are also able to obtain student loans. Students in England on nursing, midwifery and most allied health professional (AHP) undergraduate pre-registration courses will have access to the standard student support package of tuition fee loans and support for living costs.

Further information regarding funding for Health students can be found on [www.nhsbsa.nhs.uk](http://www.nhsbsa.nhs.uk), the NHS Business Services Authority (NHSBSA) website. Students are advised to check the website on a regular basis for the latest funding information.

## EU students

At the time of going to print information concerning funding for new entrant EU students 2020/21 was yet to be confirmed.

\* subject to eligibility criteria

## Maintenance loan

If you are a full-time or part-time Home student, you can apply for a Maintenance Loan. This is to help you with the day-to-day costs of going to university (a place to live, food, travel and course materials, for example). The amount you can borrow depends on where you live and study and your household income. You can apply for your Maintenance Loan when you apply for your Tuition Fee Loan.

For more information, please visit: [www.canterbury.ac.uk/studentfinance](http://www.canterbury.ac.uk/studentfinance)

In addition, the University offers a range of grants, bursaries and scholarships to eligible students.

For more information, please visit: [www.canterbury.ac.uk/study-here/funding-your-degree](http://www.canterbury.ac.uk/study-here/funding-your-degree)

## Student Loans Company

For more information about the Student Loans Company, visit: [www.slc.co.uk](http://www.slc.co.uk)

For updates, please visit: [www.thestudentroom.co.uk](http://www.thestudentroom.co.uk)

## Work while you study

You may wish to find employment to supplement your income and gain valuable work experience whilst studying.

Unitemps, our in house recruitment service offers part-time and vacation work, internships, placements and full-time work opportunities both within the University and with local businesses.

For more details, visit: [www.canterbury.ac.uk/unitemps](http://www.canterbury.ac.uk/unitemps)

# Advice for international students.

We have been welcoming international students to Canterbury Christ Church University for many years and there's lots of information and advice on our website about what you may need to know before applying and the application process itself. Our friendly team is here to help you, so please visit [www.canterbury.ac.uk/international](http://www.canterbury.ac.uk/international) or email [admissions@canterbury.ac.uk](mailto:admissions@canterbury.ac.uk)

## Entry requirements

Canterbury Christ Church University recognises a wide variety of international qualifications for entry to undergraduate courses. Detailed entry requirements for many countries can be found on our website: [www.canterbury.ac.uk/international/your-country](http://www.canterbury.ac.uk/international/your-country)

Some courses require specific subjects to have been studied and you should check the course entry on our website for details.

If you need a visa to study in the UK you will need to meet current visa requirements.

## Tuition fees, funding and scholarships

Our tuition fees are published on our online prospectus on our website. The fees quoted are inclusive of registration and examination fees.

We are pleased to offer self-funding overseas students a 3% discount on tuition fees if you are able to pay your fees in full before arrival or during the registration period before you attend any classes.

For information on financial support and scholarships, please visit the following web pages: [www.canterbury.ac.uk/funding-your-degree](http://www.canterbury.ac.uk/funding-your-degree)

## Living expenses

International students are advised to budget approximately between £615-£955 per month for living expenses including accommodation. If you would like more information on this, visit: [www.canterbury.ac.uk/cost-of-living](http://www.canterbury.ac.uk/cost-of-living)

Please note that if you require a Tier 4 Visa\* to study, you will be required to submit bank statements to show that you have sufficient funds to cover any tuition fees not already paid, as well as money to cover your living expenses (maintenance). The amount you must show for maintenance depends on the type and length of your course. A summary of this information may also be found at: [www.canterbury.ac.uk/study-here/international/docs/international-guide.pdf](http://www.canterbury.ac.uk/study-here/international/docs/international-guide.pdf)

Our Admissions Team will be able to advise you on this during your admission process. Please email: [ugadmissions@canterbury.ac.uk](mailto:ugadmissions@canterbury.ac.uk)

\* Information correct at time of going to print. Please check [www.gov.uk](http://www.gov.uk) for the latest information.

## English language requirements

English language requirements vary by course and visa status.

If your school leaving certificate English exam is not recognised for admission and you are not able to take the University's own test, you will need a recognised English Language Test such as IELTS. For more information please check your country details on our website: [www.canterbury.ac.uk/international/your-country](http://www.canterbury.ac.uk/international/your-country)

Our standard IELTS requirements can be found on our website: [www.canterbury.ac.uk/int-entry-requirements](http://www.canterbury.ac.uk/int-entry-requirements)

Please note that a small number of courses have non-standard requirements. This is usually due to professional accreditation requirements. Entry requirements may also vary for students joining the University via a formal partnership agreement. Please contact the International Office for details.

If you have taken or if you are planning to take a different English test, please contact the International Office to check its acceptability.

For students who do not achieve the required scores for undergraduate courses we offer an intensive 10-week or 6-week (dependent on entry level) Pre-session course in Academic English Skills. Students are assessed during the Pre-session course and must meet the minimum English language requirement for their chosen course of study in order to proceed. Other English language courses, such as General English with IELTS Preparation are available throughout the year.

For further details, please contact the International Office, visit: [www.canterbury.ac.uk/pre-session-english](http://www.canterbury.ac.uk/pre-session-english)

This information is provided for guidance only. If you apply to study at the University and receive a conditional offer, your offer letter will state the academic and English language requirements you must meet for admission.

Please note that changes to the University's requirements can occur as a result of updates to University policies or changes in UKVI requirements. Please check our website for the latest information on English language requirements.

The University will contact you if any changes occur that affect your offer to study with us.

## International Foundation Year/ Certificate\*

This course is designed with international students in mind. It is the first year of a four-year undergraduate degree and will enable you to improve your English, study skills and content knowledge to the level necessary to join the BA/BSc course you have selected.

We also offer the International Foundation Certificate. This will enable you to improve your English language and study skills and on successful completion you will be awarded the International Foundation Certificate and can then apply to join our Year 1 BA/BSc degree courses. See page 57 for further details.

Find out more, visit: [www.canterbury.ac.uk/courses/international-foundation-year](http://www.canterbury.ac.uk/courses/international-foundation-year)

\* subject to visa conditions

# Further information.

## Our agreement with you

An offer of a place on a course is made on the basis that in accepting such an offer you as an applicant reach an agreement with Canterbury Christ Church University in relation to an academic contract. The agreement comes into effect when you accept an offer made by the University. If the offer is conditional, the agreement becomes operational when the condition is fulfilled, for example on obtaining certain examination results and taking up the accepted place at the University.

In accepting the offer of the place you are agreeing that you will either pay the published course fees and other additional costs or arrange for them to be paid by a sponsor or a lender such as the Student Loan Company. However, you need to understand that you are held responsible for the payment of the fees, even if a sponsor or lender fails to make the payment on your

behalf. You are required to pay your tuition fees in full, or have made an arrangement with the University to pay, before starting your course. Your tuition fees become due for payment on the first day of your course, and additional costs become payable when notified to you. The University has a written policy on student debt, which forms part of our agreement with you.

As a student of the University you are required to adhere to University regulations. These regulations are detailed in the University Requirements Relating to Student Registration, Student Procedures and Regulations for the Conferment of Awards and the Assessment Procedures Manual. There are also requirements you need to fulfil relating to the use of IT services and the library, together with attendance and discipline. You will have the opportunity to read the regulations that apply to you when you are offered a place and before you enrol.

Following your registration, you will receive documents describing the teaching and assessment arrangements and other educational services. The University undertakes to take all reasonable steps to provide educational services in the manner set out in the prospectus and in the additional documents outlined above, and to consult with you over any proposed material changes before they are implemented.

**For further information, please visit:**  
[www.canterbury.ac.uk/student-tsandcs](http://www.canterbury.ac.uk/student-tsandcs)

As a student, you must fulfil the assessment and examination requirements for your course before progressing to the next year or stage of study. You may be required to withdraw from the course if you fail to meet these requirements.

## Equality and diversity

Canterbury Christ Church University is committed to providing a fair environment in which everyone is treated with dignity and respect. This means sustaining a culture that is free from discrimination linked to age, caring responsibilities, disability, gender identity or reassignment, marital status (including civil partnership status) pregnancy and maternity, race, religion and belief,

sex or sexual orientation, or any combination of these characteristics.

The University takes a proactive approach to promoting equality and is committed to a range of actions intended to create a welcoming and positive environment for all staff, students and stakeholders.

**For full information visit:**  
[www.canterbury.ac.uk/about/equal-opportunities](http://www.canterbury.ac.uk/about/equal-opportunities)

Canterbury Christ Church is committed to supporting and empowering students with medical conditions, disabilities and specific learning difficulties to enable them to participate fully in all aspects of the University's academic and social programmes.

## Disability statement

Canterbury Christ Church University offers a supportive and confidential service to disabled students, including Specific Learning Differences and medical conditions. The Disability Advice Team also offer advice to those who suspect they have a Specific Learning Difference but have no diagnosis.

The disability policy is implemented through all the University's academic and administrative departments and in collaboration with the Students' Union. The Disability Advice Team is located within Student Services and Administration and you are encouraged to contact them to discuss your potential support needs.

## Improvements to physical access

Some of the University's buildings include features which present problems for those with disabilities. However, there is a programme of improvements to remove physical barriers to access wherever practicable.

The University endeavours to provide the maximum possible support to students, implementing reasonable adjustments following an assessment of the individual. Facilities and adjustments to teaching practice are being amended and improved constantly to ensure full participation by disabled students. Individual enquiries should in the first instance be addressed to: [disability@canterbury.ac.uk](mailto:disability@canterbury.ac.uk)

## Information for disabled students

Whether you have a disability or want to learn more about the support that is available for disabled students, our advisers are able to help.

**For more information, please visit:**  
[www.canterbury.ac.uk/disability-support](http://www.canterbury.ac.uk/disability-support)

## Students under the age of 18

Canterbury Christ Church University is committed to the safety and wellbeing of all its students but has particular responsibilities in relation to those who are under 18 years of age on entry. Such students are regarded as children under UK law. The University cannot assume parental responsibility for a student under the age of 18. Students and their families should bear in mind that the University is an adult environment. Students are expected

to behave like adults and to assume adult levels of responsibility.

## Membership of the Students' Union

As a student of the University you are able to become a member of the Students' Union, although you can decide to opt out of membership if you want. If you do not wish to become a member of the Union, you can let us know by sending an email to: [i-zone@canterbury.ac.uk](mailto:i-zone@canterbury.ac.uk), and your details will not be passed to the Students' Union. You can change your mind at any time.

## The University day

The University day is from 09:00 to 19:00, Monday to Friday, on a semester basis with two semesters each academic year. Students may be taught at any time during this period. Students on placements and field trips may need to undertake their studies outside these times.

UCAS information.

# UCAS codes.

## UCAS INSTITUTION CODES

**Institution code name:**  
CANCC

**Campus code for Canterbury:**  
NONE REQUIRED

For individual UCAS codes, please check the course entry in this guide, our online prospectus or [www.ucas.com](http://www.ucas.com)  
For a full list of combined honours course codes, please visit: [www.canterbury.ac.uk/combined-honours-degrees](http://www.canterbury.ac.uk/combined-honours-degrees) or [www.ucas.com](http://www.ucas.com)

**Institution code:**  
C10

**Campus code for Medway:**  
M

## APPLYING VIA UCAS

(Universities and Colleges Admissions Service)

For all courses in the prospectus which state that application is made through UCAS you must apply online at: [www.ucas.com](http://www.ucas.com)

There are three types of applicant:

### 1. Students at a school or college

Advice is available from your teacher or a careers adviser at your school or college. You fill in an online application and submit it to a member of staff. After checking your details, and having added the academic reference, your school or college submits the completed application online to UCAS. You pay online using a credit card or debit card. You may also be able to pay through your school or college.

### 2. Independent applicants in the UK

Other UK applicants, who are not at school or college, apply online independently.

It is likely that you are a mature applicant, who, unlike school and college students, cannot readily seek advice from your teacher, but can instead consult with various careers organisations. You are responsible for paying the correct application fee, for obtaining and attaching the academic reference and for submitting the completed application online to UCAS.

### 3. International applicants outside the UK (EU and worldwide)

Except for those whose school or college is registered with UCAS, individuals from the EU (excluding the UK), and worldwide, apply online independently.

Advice is available from British Council offices and other centres overseas, such as your school or college. You are responsible for paying the correct application fee, for obtaining and attaching the academic reference and for submitting the completed application online to UCAS.

For all applicants, to make it as easy as possible for you to fill in your online application, there are full instructions at: [www.ucas.com](http://www.ucas.com)

# UCAS codes: Combined Honours.

## Studying more than one subject?

Subjects that can be studied in combination are listed A-Z on the following pages, along with their UCAS code. There may be more than one UCAS code per combination, so if you can't find a combination under

one subject you should also look under the second subject. Codes are correct at the time of publication (February 2019). For the most up-to-date listings, please visit [www.ucas.com](http://www.ucas.com)

## Important information about this prospectus. Please read carefully.

The information was accurate at the time when the prospectus was printed in February 2020. On occasions it may be necessary to change details relating to a particular course that commences from September 2021 onwards. Any changes will be set out on the web page relating to the course. It is recommended that prospective students look at the web page both for further information on the course and for any notifications of changes to the details in the prospectus. Where there has been a material change to a course, we will draw this to the attention of applicants at the earliest opportunity.

Applicants should not rely solely on this prospectus and should visit the University website for up-to-date information when considering applying to the University: [www.canterbury.ac.uk](http://www.canterbury.ac.uk)

## Subject to validation

Some of the courses in this prospectus may be in the process of development or review at the time of going to print. For the latest information on the status of your chosen course, please visit the relevant page on our online prospectus.

Photography throughout this prospectus features Canterbury Christ Church University students and staff. Photography by Jack Peilow, with additional images from Felicity Brambling-Wells, Peter Cook, Jason Dodd, Alex Hare, Lucy Mohr and Daisy Watson.

This prospectus was designed by Pang Agency: [pangagency.co.uk](http://pangagency.co.uk) and the University's Department of Marketing and Communications and printed by Belmont Press.

If you have any comments regarding this prospectus please write to: The Head of Student Recruitment Marketing, Canterbury Christ Church University, North Holmes Road, Canterbury, Kent CT1 1QU
